lord of the deep the deep ocean is by far the planet s largest biome and holds a wealth of potential natural assets human exploitation of the deep ocean is rapidly increasing whilst becoming more visible to many through the popular media particularly film and television the scientific literature of deep sea exploitation and its effects has also rapidly expanded as a direct function of this increased national and global interest in exploitation of deep sea resources both biological e g fisheries genetic resources and non biological e g minerals oil gas methane hydrate at the same time there is a growing interest in deep sea contamination including plastics with many such studies featured in high profile scientific journals and covered by global media outlets however there is currently no comprehensive integration of this information in any form and these topics are only superficially covered in classic textbooks on deep sea biology this concise and accessible work provides an understanding of the relationships between biodiversity and ecosystem functioning both at the seafloor and in the water column and how these might be affected as a result of human interaction exploitation and ultimately environmental change it follows a logical progression from geological and physical processes ecology biology and biogeography to exploitation management and conservation natural capital and exploitation of the deep ocean is aimed at marine biologists and ecologists oceanographers fisheries scientists and managers fish biologists environmental scientists and conservation biologists it will also be of relevance and use to a multi disciplinary audience of fish and wildlife agencies ngos and government departments involved in deep sea conservation and management something has awoken roused from its slumber following an antarctic ice quake an immense beast has risen from the depths dwarfing even the mighty blue whale the gargantuan wonder of evolution takes charge of the oceans setting a catastrophic chain of events in motion henry rainwater is a rookie crab fisherman trying to shake the family namesake and make his own way in life after surviving an encounter with the beast which sees his father and the rest of the crew of their family boat killed rainwater becomes a recluse deathly afraid of the creature which lurks in the ocean the only man that believes rainwater is andrews an ambitious scientist charged by the government to investigate the existence of the creature rainwater soon finds out that andrews has different motivations for locating the beast driven to find his redemption and clear his name henry must overcome his terror and set out to sea in order to track down and kill the creature in the hope of finding it before andrews and his unhinged superior russo can put their own plan into action one which could have terrible repercussions for the entire human race a collection containing secret under
