## **Child Development in a Life-Span Perspective 2013-04-15**

comprised of papers written by members of the social science research council subcommittee on child development in life span perspective this book provides a representation of the current status of the relation between child development and the life span it suggests the possible synthesis of these two fields from both conceptual and empirical evidence theories and methods concerning the social psychological and anatomical influences on children's cognitive

development through adolescence are highlighted

### ***Lifespan Development 2005-12-01***

although there has been a significant increase in studies of stress and coping processes in recent years researchers have often approached these topics from rather narrow and constrained perspectives furthermore little communication has occurred across disciplines and research directions resulting in the emergence of several relatively isolated literatures an outgrowth of the eleventh biennial west virginia university conference on life span development this volume emphasizes two major themes the importance of taking a life span approach to the study of stress and coping and the development of new and more complete conceptual models of stress and coping processes the first to approach these subjects from a life span perspective this book includes papers by distinguished researchers from each of the major periods of the life span and brings together the cognitive and socioemotional traditions in the study of dealing with pressures the editors hope that this facilitation of communication among researchers with diverse views will help create a broadening and integration of perspectives

### ***Lifespan Development 2001-06***

this volume presents the reader with a stimulating rich tapestry of essays exploring the nature of action and intentionality and discussing their role in human development as the contributions make clear action is an integrative concept that forms the bridge between our psychological biological and sociocultural worlds action is also integrative in the sense of entailing motivational emotional and cognitive systems and this integration too is well represented in the chapters action is defined and distinguished from behavior according to its intentional quality thus a constantly recurring theme in the volume involves the dialectic of action intentionality and specifically the questions of how and when these concepts are to be distinguished for action theorists action as distinguished from behavior constitutes the fundamental mechanism of human development this commitment is detailed in several essays that explore the life span implications of action this timely volume will be must reading for all who want to learn about or stay current with contemporary action theoretical approaches to human development willis f overton temple university the present volume advances the view that we cannot go far in understanding development over the life span without paying heed to self reflective processes in a reciprocal way self reflection links developmental change in the ways in which the person constructs his or her own development over the life span development action and intentionality exist then in an intimate relationship as development forms the social and historical settings within which intentional activity is embedded thus become indispensable categories for developmental theory and research due to their potential to integrate culture history and personality action theoretical concepts have made strong inroads in many areas of social and behavioral research within the field of developmental psychology researchers have come to recognize that developmental patterns and their variation across historical and social contexts cannot easily be reduced to invariant laws instead they reflect the agency of both the culture and the person issues of intentional self development gain particular importance within the developmental settings of modernity under conditions of cultural acceleration globalization and pluralization of life forms normative scripts and timetables of development have become blurred and people are increasingly forced to take a planful self monitoring and optimizing stance toward their own behavior and development as will become evident throughout this ground breaking book an action perspective on development covers a broad spectrum of theoretical approaches concepts such as personal goals personal projects life themes meaning life planning compensation or intentional self development have become the nuclei of innovative research programs the chapters collected in this volume by scholars on the forefront of action theory and research provide an indication of the promise that these notions hold for life span developmental psychology motivation research and research on aging

### ***Life-span Developmental Psychology 2014-01-02***

lifespan development biopsychosocial perspectives provides students with complete explorations of each developmental stage of the lifespan beginning with conception and concluding with an examination of successful aging the book presents human development theory and research within a biopsychosocial framework presenting information regarding biological psychological and social functioning during each significant period of the lifespan the first chapter of the

text presents readers with an introduction to human development addressing the meaning of age and aging the four key principles of human development the social factors that influence the study of human development and more the succeeding chapters progress in step with the human lifespan beginning with conception and prenatal development moving through infancy childhood adolescence and adulthood and concluding with chapters devoted to later life the biopsychosocial perspective of the text emphasizes the transactional nature of biological psychological and social influences on the developing individual with a focus on positive development and the implications on health and wellness it emphasizes the applied nature of the biopsychosocial perspective each chapter begins with a real life scenario challenging students to take the perspectives of individuals and practitioners dealing with issues at every stage of development designed to provide readers with a holistic understanding of the complex progression of human life and aging lifespan development is an ideal text for courses in psychology and human development
