s 2018 new south studies in rural culture

book award contextualizing the techniques and methods of the
incredibly rich and vital genre of site specific performance author
bertie ferdman traces the evolution of that term originally used for
experimental staging practices and then later also for engaged
situational events site specific is no longer sufficient for the genre
s many contemporary variations using the term off site ferdman
illustrates five distinct ways artists have challenged the
disciplinary framework of site specific theatre blurring the
traditional boundaries between the fictional and the real changing how
the audience and actor interact with each other and whether they are
physically together or apart fabricating sites from physically bound
conceptually constructed or virtual spaces staging live situations in
real nonreal and often mediated encounters and challenging our
preconceived notions of time and space tracing the genealogy of site
based work through the twentieth and twenty first centuries ferdman
outlines the theoretical groundwork for her study in the introduction
individual chapters focus on distinct types of off sites the
interdisciplinary discourse of disciplinary sites the spaces of
audience engagement with spectator sites the dislocation of time of work
temporal sites and the historiographical spaces of mapping in the new
