Ethical and Policy Issues in International Research: Commissioned papers and staff analysis 2001

the objective of the 2014 international conference on computer network security and communication engineering cnsce2014 is to provide a platform for all researchers in the field of computer network security and communication engineering to share the most advanced knowledge from both academic and industrial world to communicate with each other about their experience and most up to date research achievements and to discuss issues and future prospects in these fields as an international conference mixed with academia and industry cnsce2014 provides attendees not only the free exchange of ideas and challenges faced by these two key stakeholders and encourage future collaboration between members of these groups but also a good opportunity to make friends with scholars around the world as the first session of the international conference on cnsce it covers topics related to computer network security and communication engineering cnsce2014 has attracted many scholars researchers and practitioners in these fields from various countries they take this chance to get together sharing their latest research achievements with each other it has also achieved great success by its unique characteristics and strong academic atmosphere as well as its authority

due to the popularity of internet it becomes very easy for people to share their views over social networking websites most popular website among them is twitter twitter is a widely used social networking website that is used by the numerous people to give their opinion regarding a particular topic or product so today it becomes necessary to analyze the tweet of the people the process to analyze and interpret the tweets is known as sentiment analysis the main motive of this project is to identify how the tweets on the social networking website are used to identify the opinion of people regarding the particular product or policy twitter is an online website that allows the user to post the status of maximum 140 characters twitter has over 200 million registered users and 100 million active users 34 so it comes to be a great source of valuable information this project aims to develop a better way for sentiment analysis which is nothing a simple way to classify the tweets into positive negative or neutral the result of the sentiment

analysis can be used by various organizations sentiment analysis can be used for forecasting the stock exchange used to predict the popularity of any product in market or used to predict the result of elections based on the public views on the social sites the main motive of project is to develop a better way to accurately classify the unknown tweets according to their content

first published in 1995 surface analysis of paper examines surface analysis techniques from a paper industry perspective and places heavy emphasis on applications modern techniques including ion mass spectrometry infrared spectroscopy and optical profilometry are reviewed in a straightforward manner this new book provides details on widely used methods and instruments and discusses how they can be used to attain for example contour maps of the microscopic constituents on paper surfaces and accurate analyses of the physical properties of paper organized into three sections surface analysis of paper provides thorough coverage of the physical characteristics of paper and a clear picture of new and emerging analytical methods carefully chosen background material on fundamental concepts is included wherever such material assists in understanding the uses of analysis methods each chapter contains an introduction a description of the technique a

discussion of the type of information that can be obtained with the particular technique
practical examples to demonstrate the advantages of the technique

this volume aims to overcome sub disciplinary boundaries in the study of linguistic variation be it language internal or cross linguistic even though dialectologists register analysts typologists and quantitative linguists all deal with linguistic variation there is astonishingly little interaction across these fields but the fourteen contributions in this volume show that these subdisciplines actually share many interests and methodological concerns in common the chapters specifically converge in the following ways first they all seek to explore linguistic variation within or across languages second they are based on usage data that is on corpora of more or less authentic text or speech of different languages or language varieties third all chapters are concerned with the joint analysis also sometimes known as aggregation or data synthesis of multiple phenomena features or measurements of some sort and lastly the contributors all marshal quantitative analysis techniques to analyse the data in short the volume explores the text feature aggregation pipeline in variation studies demonstrating that there is much mutual inspiration to be had by thinking outside the disciplinary box

the international handbook of research in professional and practice based learning discusses what constitutes professionalism examines the concepts and practices of professional and practice based learning including associated research traditions and educational provisions it also explores professional learning in institutions of higher and vocational education as well the practice settings where professionals work and learn focusing on both initial and ongoing

development and how that learning is assessed the handbook features research from expert contributors in education studies of the professions and accounts of research methodologies from a range of informing disciplines it is organized in two parts the first part sets out conceptions of professionalism at work how professions work and learning can be understood and examines the kinds of institutional practices organized for developing occupational capacities the second part focuses on procedural issues associated with learning for and through professional practice and how assessment of professional capacities might progress the key premise of this handbook is that during both initial and ongoing professional development individual learning processes are influenced and shaped through their professional environment and practices moreover in turn the practice and processes of learning through practice are shaped by their development all of which are required to be understood through a range of research orientations methods and findings this handbook will appeal to academics working in fields of professional practice including those who are concerned about developing these capacities in their students in addition students and research students will also find this handbook a key reference resource to the field
