reimagining our global economy so it becomes more sustainable and prosperous for all our global economic system is broken but we can replace the current picture of global upheaval unsustainability and uncertainty with one of an economy that works for all people and the planet first we must eliminate rising income inequality within societies where productivity and wage growth has slowed second we must reduce the dampening effect of monopoly market power wielded by large corporations on innovation and productivity gains and finally the short sighted exploitation of natural resources that is corroding the environment and affecting the lives of many for the worse must end the debate over the causes of the broken economy laissez faire government poorly managed globalization the rise of technology in favor of the few or yet another reason is wide open stakeholder capitalism a global economy that works for progress people and planet argues convincingly that if we don't start with recognizing the true shape of our problems our current system will continue to fail us to help us see our challenges more clearly schwab the founder and executive chairman of the world economic forum looks for the real causes of our system's shortcomings and for solutions in best practices from around the world in places as diverse as china denmark ethiopia germany indonesia new zealand and singapore and in doing so schwab finds emerging examples of new ways of doing things that provide grounds for hope including individual agency how countries and policies can make a difference against large external forces a clearly defined social contract agreement on shared values and goals allows government business and individuals to produce the most optimal outcomes planning for future generations short sighted presentism harms our shared future and that of those yet to be born better measures of economic success move beyond a myopic focus on gdp to more complete human scaled measures of societal flourishing by accurately describing our real situation stakeholder capitalism is able to pinpoint achievable ways to deal with our problems chapter by chapter professor schwab shows us that there are ways for everyone at all levels of society to reshape the broken pieces of the global economy and country by country company by company and citizen by citizen glue them back together in a way that benefits us all

essay from the year 2011 in the subject business economics business ethics corporate ethics grade 1 8 heriot watt university edinburgh language english abstract the notion corporate social responsibility csr has provoked an extensive history of academic debate whether

corporations have a social as well as financial responsibility to the community or not the main conflict in this field has been associated with the evolution of the concept and the definition of csr even though this concept has a long and varied history which arose centuries ago the formal writing on social responsibility however is mostly a product of the past 50 years during that time there have been many papers published by academics and business practitioners bowen 1953 marks the beginning of the modern period of literature and argued that centralised power of big corporations had influence on the lives of citizens by company's actions and decisions davis 1960 became famous because he emphasised the correlation between social responsibility and business power and justified socially responsible business decision in light of a good chance of bringing long run prosperity to the corporation in arguing against csr milton friedman 1970 seems to be widely accredited in fact he does not dispute the validity of csr but rather argues that when these activities are carried out for reasons of self interest then they are merely profit maximization under the cloak of csr he set forth that the social responsibility of business is to increase their profits and its managers responsibility to act solely in the interest of its shareholders maximising shareholders value this being said as a short introduction to the academic development of csr highlights that csr is not at all common sense and therefore needs further theoretically examination besides these debates in the academic world there has been also a development in practise the business world offers numerous examples

no longer only the domain of corporate public relations corporate social responsibility csr has now become a serious concern for many firms and a major sphere of academic research however most strikingly by encouraging corporations to play a role in economic governance particularly at the global level csr also raises issues for political science public policy and the world of politics as a whole in this volume authors consider what defines a responsible corporation examining such debates as the implications of corporations setting standards for such matters as products and labour conditions and thus playing more than a market role in the global economy how the concept of corporate citizenship has been applied to the role of firms in corporate responsibility initiatives and what this means in terms of rights and responsibilities and for citizenship in general and whether corporate responsibility is compatible with shareholder maximization specifically in the context of the global economy bringing together academics and practitioners this volume examines the increasingly important arena of global economic governance and the role played by major corporations from a diverse range of perspectives it will be of particular interest to academics researchers and students of business political science and other social sciences as well as business practitioners interested in csr
