The Bookseller

1888

maisie has returned from her visit to tellus earth maisie is reaping the
results of her foolishness how can she teach class and be the emperor s
emissary on a first contact mission how can she put off any public announcement
about her relationship with olef the last part of the maisie trilogy the
apprentice s talent the journeyman s talent and book 5 of the talent s universe
it s best read after the solar alliance and starship chief about 114 800 words

Bookseller and the Stationery Trades' Journal

1887

a dinosaur book like no other this irreverent chronicle of science and
pseudoscience takes the reader on a journey through numerous bizarre ideas
about ancient reptiles were dragon legends inspired by human encounters with
fire breathing dinosaurs do the bible and other ancient works of literature and
art depict dinosaurs astoundingly those and other strange notions have
infiltrated grade school science textbooks this exposé unmasks the errors that
underlie such notions and reveals the science that flattens them while treating
readers to explanations of rocket fuel nuclear power plants the electric eel s
shocking capabilities and how the young earth creationist position contradicts
the very scripture that it strives to uphold finding humor in absurdity the
book shows fans of science religious studies folklore and fire that young earth
creationist dinosaur pseudoscience is deeply comic once one gets to know it
properly

Protecting America's Competitive Edge Act (S. 2198)

2006

chemistry graduate education is under considerable pressure pharmaceutical
companies long a major employer of synthetic organic chemists are drastically
paring back their research divisions to reduce costs chemical companies are
opening new research and development facilities in asia rather than in the
united states to take advantage of growing markets and trained workforces there
universities especially public universities are under significant fiscal
constraints that threaten their ability to hire new faculty members future
federal funding of chemical research may be limited as the federal budget
tightens all of these trends have major consequences for the education of
chemistry graduate students in u s universities to explore and respond to these
intensifying pressures the board on chemical sciences and technology held a
workshop in washington dc on january 23 24 2012 titled graduate education in
chemistry in the context of a changing environment the workshop brought
together representatives from across the chemical enterprise representing
leaders and future leaders of academia industry and government the goal of the
workshop was not to come to conclusions but to have an open and frank

discussion about critical issues affecting chemistry graduate education such as the attraction and retainment of the most able students to graduate education financial stressors on the current support model and their implications for the future model competencies needed in the changing job market for ph d chemists and competencies needed to address societal problems such as energy and sustainability challenges in chemistry graduate education a workshop summary is organized into six chapters and summarizes the workshop on graduate education in chemistry in the context of a changing environment
