educational technology adoption is more widespread than ever in the wake of covid 19 as corporations have commodified student engagement in makeshift packages marketed as gamification this book seeks to create a space for playful learning in higher education asserting the need for a pedagogy of care and engagement as well as collaboration with students to help us reimagine education outside of prescriptive educational technology virtual learning has turned the course management system into the classroom and business platforms for streaming video have become awkward substitutions for lecture and discussion gaming once heralded as a potential tool for rethinking our relationship with educational technology is now inextricably linked in our collective understanding to challenges of misogyny white supremacy and the circulation of misinformation the initial promise of games based learning seems to linger only as gamification a form of structuring that creates mechanisms and incentives but limits opportunity for play as higher education teeters on the brink of unprecedented crisis this book proclaims the urgent need to find a space for playful learning and to find new inspiration in the platforms and interventions of personal gaming and in turn restructure the corporatized surveilling classroom of a gamified world through an in depth analysis of the challenges and opportunities presented by pandemic pedagogy this book reveals the conditions that led to the widespread failure of adoption of games based learning and offers a model of hope for a future driven

by new tools and platforms for personal experimental game making as intellectual inquiry

## Playful Pedagogy in the Pandemic

### *A Mandate for Playful Learning in Preschool*

2009

the basis of this video and book pack steps is a belief in the rights of the young child to appropriate opportunities to be children and to learn in playful and meaningful ways it is also predicated upon a view that practitioners working with

young children have equal rights to teach using playful strategies children and adults are responsible for making the most of the playful learning and teaching opportunities provided in quality early childhood settings and to ensure that the curriculum statutory or recommended is implemented efficiently and effectively the view taken throughout is that there is no conflict between being accountable to parents politicians or providers for children s learning and offering play experiences as the basis for that learning playful teaching and learning are discussed and exemplified throughout the two elements of the pack the video offers viewers a chance to see some of the practitioners who contributed to the pack in their own settings using aspects of steps to support their everyday teaching and learning one of the major intentions of the pack is that it should be used by practitioners and settings or those undertaking training sessions with them to both evaluate and extend play practices the video child development charts planning sheets and other documentation explained in various sections support a variety of uses across a range of settings reflecting different backgrounds and ethos once the framework is understood the steps themselves offer endless opportunities for development of quality learning experiences for children and for articulation explanation and advocacy of quality practice by practitioners to parents inspectors and those who evaluate settings
