occasion of the 50th anniversary of the publication of piero sraffa s production of commodities by means of commodities the papers selected and contained in sraffa and the reconstruction of economic theory account for the work completed around the two central aspects of his contribution to economic analysis namely the criticism of the neoclassical or marginalist theory of value and distribution and the reconstruction of economic theory along the lines of the classical approach divided into three volumes sraffa and the reconstruction of economic theory debates the most fruitful routes for advancement in this field and their implications for applied and policy analysis this second volume focuses on the theory of output and growth as developed in the modern classical approach on the basis of the extension to the long run of the keynesian principle of effective demand and on the implications of the revival of the classical approach for policy analysis and for understanding the beginning of the great war a number of the most dispassionate and detached thinkers of our time have expressed the same general idea two eminent british sociologists have recently expressed themselves thus we are compelled to the admission one hard for the student the man of pure or applied science that the essential problem of life is not material but psychical in a word life needs to be eupsychic or in an older word religious 2 in may 1916 mr gr lowes dickinson said in a private conversation with the author if i should guess i would say that the great need of the world just at present is more religion of course i mean religion of the right sort of religion of a certain sort there is a plenty but not enough of the right sort 3 again in march 1915 the author had the pleasure of visiting with mr frederic harrison the veteran leader of the english positivists mr harrison forcefully expressed the opinion that the great war was due to the decadence of ethical religion and that the problem of world peace and order would never be settled until the religious question was settled about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at nineteenth century marked the long awaited release of millions of black slaves subsequently these former slaves attempted to reconstruct the basis of american democracy w e b du bois one of the greatest intellectual leaders in united states history evaluates the twenty years of fateful history that followed the civil war with special reference to the efforts and experiences of african americans du bois s words best indicate the broader parameters of his work the attitude of any person toward this book will be distinctly influenced by his theories of the negro race if he believes that the negro in america and in general is an average and ordinary human being who under given environment develops like other human beings then he will read this story and judge it by the facts adduced the plight of the white working class throughout the world is directly traceable to american slavery on which modern commerce and industry was founded du bois argues moreover the resulting color caste was adopted forwarded and approved by white labor and resulted in the subordination of colored labor throughout the world as a result the majority of the world s laborers became part of a system of industry that destroyed democracy and led to world war i and the great depression this book tells that story notice this book is published by historical books limited publicdomain org uk as
