1500+ Culture, Lifestyle, Hobbies, Tourism & Downright Hilarious Events Promotions, Holidays & Anniversaries for 2019 2019-06-04 why is classical music predominantly the preserve of the white middle classes contemporary associations between classical music and social class remain underexplored with classical music primarily studied as a text rather than as a practice until recent years in order to answer this question this book outlines a new approach for a socio cultural analysis of classical music asking how musical institutions practices and aesthetics are shaped by wider conditions of economic inequality and how music might enable and entrench such inequalities or work against them this approach is put into practice through a richly detailed ethnography which locates classical music within one of the cultures that produces it middle class english youth and foregrounds classical music as bodily practice of control and restraint drawing on the author's own background as a classical musician this closely observed account examines youth orchestra and youth choir rehearsals as a space where young people learn the unspoken rules of this culture of weighty tradition and gendered control it highlights how the middle classes habitual roles boundary drawing around their protected spaces and reproducing their privilege through education can be traced within the everyday spaces of classical music these practices are camouflaged however by the ideology of autonomous art that classical music carries rather than solely examining the social relations around the music the book demonstrates how this reproductive work is facilitated by its very aesthetic of controlled excitement getting it right precision and detail this book is of particular interest at the present moment thanks to the worldwide proliferation of el sistema inspired programmes which teach classical music to children in disadvantaged areas while such schemes demonstrate a resurgence in defending the value of classical music there has been a lack of debate over the ways in which its socio cultural heritage shapes its conventions today this book locates these contestations within contemporary debates on class gender and whiteness making visible what is at stake in such programmes

Class, Control, and Classical Music 2016-04-26 currently there is very little academic literature dealing with the topic of record collecting and when the topic is broached it appears to be done so with some level of suspicion towards the record collector as such the only depictions of record collectors in the public domain tend to be very stereotypical and demeaning this work serves as a new starting point in how the record collector and the practices involved are viewed and understood by considering the roots of these stereotypes which mainly stem from the work of the frankfurt school theorists who lived during a time of great insecurity both in regards to new methods of production for cultural artefacts and art but also their physical lives once this has been achieved a consideration of more realistic record collecting practices takes place through discussions with collectors themselves an examination of a collectible record label vertigo records and a diachronic analysis of the theories that have contributed to a fallacious view of the record collector the record collector consumes his/her records on an individual basis both in terms of person to person but also and crucially even record to record

ultimately it is argued that one cannot define consumption through the artefact's production which most considerations of the record collector have mistakenly done
