intelligent manufacturing intelligent home intelligent transportation and intelligent medicine aim to capture new opportunities brought by 5g this compendium set focuses on the key technologies requirements users experiences industry applications and industrial reforms from the perspective of experts and comprehensively introduces the related knowledge of 5g these reference volumes inform readers the essences of 5g potential changes to the development of public life and society brought by 5g as well as the potential security and risks such as the legal moral and ethical aspects the set also prominently reflects the latest business status in different industrial and social fields and the great changes that follow this book presents a detailed pedagogical description of the 5g commercial wireless communication system design from an end to end perspective it compares and contrasts nr with lte and gives a concise and highly accessible description of the key technologies in the 5g physical layer radio access network layer protocols and procedures this book also illustrates how the 5g core and epc is integrated into the radio

access network how virtualization and edge computer fundamentally change the way users interact with the network as well as 5g spectrum issues this book is structured into six chapters the first chapter reviews the use cases requirements and standardization organization and activities for 5g these are 5g requirements and not nr specifically as technology that meets the requirements may be submitted to the itu as 5g technology this includes a set of radio access technologies rats consisting of nr and lte with each rat meeting different aspects of the requirements the second chapter describes the air interface of nr and lte side by side the basic aspects of lte that nr builds upon are first described followed by sections on the nr specific technologies such as carrier channel spectrum duplexing including sul lte nr co existence and new physical layer technologies including waveform polar ldpc codes mimo and urllc mmte in all cases the enhancements made relative to lte are made apparent the third chapter contains descriptions of nr procedures iam beam management power control harq protocols ep up mobility including grant free and ran architecture the fourth chapter includes a detailed discussion related to end to end system architecture and the 5g core 5gc network slicing service continuity relation to epc network virtualization and edge computing the fifth and major chapter describes the itu submission and how nr and lte meet the 5g requirements in significant detail from the rapporteur responsible for leading the preparation and evaluation as well as some field trial results engineers computer scientists and professionals with a passing knowledge of 4g lte and a comprehensive understanding of the end to end 5g commercial wireless system will find this book to be a valuable asset advanced level students and researchers studying and working in communication engineering who want to gain an understanding of the 5g system as well as methodologies to
