First, Break All The Rules 1999-05-05 the greatest managers in the world seem to have little in common they differ in sex age and race they employ vastly different styles and focus on different goals yet despite their differences great managers share one common trait they do not hesitate to break virtually every rule held sacred by conventional wisdom they do not believe that with enough training a person can achieve anything he sets his mind to they do not try to help people overcome their weaknesses they consistently disregard the golden rule and yes they even play favorites this amazing book explains why marcus buckingham and curt coffman of the gallup organization present the remarkable findings of their massive in depth study of great managers across a wide variety of situations some were in leadership positions others were front line supervisors some were in fortune 500 companies others were key players in small entrepreneurial companies whatever their situations the managers who ultimately became the focus of gallup s research were invariably those who excelled at turning each employee s talent into performance in today s tight labor markets companies compete to find and keep the best employees using pay benefits promotions and training but these well intentioned efforts often miss the mark the front line manager is the key to attracting and retaining talented employees no matter how generous its pay or how renowned its training the company that lacks great front line managers will suffer buckingham and coffman explain how the best managers select an employee for talent rather than for skills or experience how they set expectations for him or her they define the right outcomes rather than the right steps how they motivate people they build on each person s unique strengths rather than trying to fix his weaknesses and finally how great managers develop people they find the right fit for each person not the next rung on the ladder and perhaps most important this research which initially generated thousands of different survey questions on the subject of employee opinion finally produced the twelve simple questions that work to distinguish the strongest departments of a company from all the rest this book is the first to present this essential measuring stick and to prove the link between employee opinions and productivity profit customer satisfaction and the rate of turnover ~~finite element~~

becoming responsible michael pritchard clears the air with a sensible plan for promoting our children s moral education through the teaching of reasonableness pritchard contends that children have a definite but frequently untapped capacity for reasonableness and that schools in a democratic society must make the nurturing of that capacity one of their primary aims as fundamental to learning as the development of reading writing and math skills reasonableness itself he shows can be best cultivated through the practice of philosophical inquiry within a classroom community in such an environment children learn to work together to listen to one another to build on one another s ideas to probe assumptions and different perspectives and ultimately to think for themselves advocating approaches to moral education that avoid mindless indoctrination and timid relativism pritchard neither preaches nor hides behind abstractions he makes liberal use of actual classroom dialogues to illustrate children s remarkable capacity to engage in reasonable conversation about moral concepts involving fairness cheating loyalty truth-telling lying making and keeping promises obedience character and responsibility he also links such discussions to fundamental concerns over law and moral authority the roles of teachers and parents and the relationship between church and state pritchard draws broadly and deeply from the fields of philosophy and psychology as well as from his own extensive personal experience working with children and teachers the result is a rich and insightful work that provides real hope for the future of our children and their moral education
