1990

this book provides an international perspective on small business and includes many useful pedagogical features such as questions for discussion international case studies and empirical research

NCERT Economics Class 12 Revised 17th Edition for the Session of 2024-25

2024-04-04

mainstream economics assumes economic agents act and make decisions to maximize their utility this model of economic behavior based on rational choice theory has come under increasing attack in economics because it does not accurately reflect the way people behave and reason the shift towards a more realistic account of economic agents has been mostly associated with the rise of behavioral economics which views individuals through the lens of

bounded rationality identity capabilities and changing economics goes further and uses identity analysis to build on this critique of the utility conception of individuals arguing it should be replaced by a conception of economic agents in an uncertain world as socially embedded and identified with their capabilities written by one of the world's leading philosophers of economics the book develops a new approach to economics theory of the individual explaining individuals as adaptive and reflexive rather than utility maximizing

Macroeconomics

2001

the green economy represents an important support to economic growth investments and competitiveness therefore it is considered to be an important alternative in attaining the general wellbeing of the humans which is seen in the decrease of the risk while preserving the environment and using alternative energy sources atmospheric gases especially carbon dioxide create the greenhouse effect which influences the climate changes they are already generating the extreme weather conditions including powerful hurricanes and floods which have recently affected the western balkans having this in mind this book is created with the intention not only to point out to the extent to which the western balkan countries have accepted the concept of green growth but also to see what results are achieved in respect of implementation of this concept with the goal of overcoming the economic and financial crisis and creating

the conditions for sustainable growth of this region besides this the intention was to emphasise the political economic and legal limitations that are blocking faster development of green economy as well as the possibilities of their overcoming this monograph has a very broad topic range with the goal of comprising the most important aspects and considerations of these issues as the end result of theoretical and research considerations of the author in approximately twenty chapters one gets a clear insight in how the region has progressed in respect of making the most important sectors green

what would it take to have a world where everyone had enough how can we eliminate poverty leave enough for nonhuman nature and increase well being this book explores ways the reader can live their life engage with cultural change and engage with policy making to build that world we are presently on a path to environmental destruction as our societies are driven by forces which leave many people without what they need to meet their basic needs while also wasting vast resources on an unsatisfying consumer economy the current system does not lead to a sense of wellbeing even among those who are relatively materially comfortable this book focuses on solutions for building a world of enough it explains how we can reorient our thinking and take the steps necessary to transform our social systems it looks at ways to reduce the insatiable desire for status and consumption that drive our economies it focuses on emerging approaches to economics that take well being as their goal and explores the policies that are crucial for getting there such as reducing inequality investing in public goods and reducing work time the book arms the reader with a variety of tools for building a world where everyone has enough for a good life

Shaping the Learning Curve

2005

McConnell and Brue's Microeconomics: Principles, Problems, and Policies is the leading principles of economics textbook because it is innovative and teaches students in a clear, unbiased way. The 17th edition builds upon the tradition of leadership by sticking to 3 main goals: help the beginning student master the principles essential for understanding the economy; help the student understand and apply the economic perspective and reason accurately and objectively about economic matters; and promote a lasting student interest in economics and the economy.

Poverty Relief in a Mixed Economy

2010

For two decades, Federal Reserve Chairman Alan Greenspan has held reign over economic policy, outlasting three presidents. His long tenure has had a profound effect on global economics and on individuals. In this hard-hitting exposé, international bestselling author Ravi Batra takes sharp aim at Greenspan's policies since he came into power. Batra argues that Greenspan has extracted trillions of dollars from the American middle class and sharply benefited the rich while protecting big business. Batra proves that Greenspan has also been responsible for periods of irrational exuberance and exposes the wild inconsistencies in his social security plans. Batra explores Greenspan's influences and motivations and the discrepancies between his words and actions while revealing how his policies have national and global impact.

Transforming the Economy of American Samoa: The economy

2002

this book discusses the law of safeguard measures as laid down in the wto agreements and cases decided by the panel and the appellate body it sets out a comprehensive treatment of safeguard measures covering the history and evolution of the law as well as the procedural requirements and the application of safeguard measures in addition to measures under article xix and the safeguards agreement the book includes coverage of safeguard measures for agricultural products special safeguard measures for developing countries safeguard measures for textiles and proposed safeguard measures under general agreement on trade in services gats as well as special safeguard clauses against china recognition and regulation of safeguard measures under gatt wto considers safeguards from a developing country s perspective drawing on joseph e stiglitz s argument that developing countries require these trade remedy measures to protect their domestic industries and ensure their development sheela rai considers this view and goes on to examine how beneficial the provisions relating to safeguard measures and their interpretation given by the panel and appellate body have been for developing countries

New Theory on Leadership

Management Science

2013

the chapters included in this volume are composed of some selected contributions from the 8th international conference of political economy icopec 2017 held in belgrade on june 28 30 2017 with the main theme of institutions national identity power and governance in the 21st century all chapters are peer reviewed by both the editors and independent scholars from the elds relevant to the manuscript s subject area the purpose of the volume is to provide and enhance our understanding of the recent trends in the social economic and nancial analysis therefore this volume includes chapters that focus on the importance of these three disciplines of social sciences which interact heavily with almost every other social science as well as the normative sciences in this sense this volume aims at providing a contemporary update to the literature from various di erent perspectives and tries to contribute to our knowledge in an e ective manner the chapters do not only present analysis of certain topics but also help to build the mindset for further studies that would be helpful in looking for answers to some of the remaining questions in these three crucial social sciences disciplines hence we are glad to put together a volume that would be useful to a large audience rather than just the technical experts

Economics Confronts the Economy

2006-05-25

the recognition is growing truly addressing the problems of the 21st century requires going beyond small tweaks and modest reforms to business as usual it requires changing the system but what does this mean and what would it entail the new systems reader highlights some of the most thoughtful substantive and promising answers to these questions drawing on the work and ideas of some of the world s key thinkers and activists on systemic change amid the failure of traditional politics and policies to address our fundamental challenges an increasing number of thoughtful proposals and real world models suggest new possibilities this book convenes an essential conversation about the future we want
