the tsr2 is one of the greatest what if aircraft of the cold war whose cancellation still generates anger and controversy among aviation fans it was a magnificent cutting edge aircraft one of the most striking of the cold war but fell victim to cost overruns overambitious requirements and politics its scrapping marked the point when britain s aerospace industry could no longer build world class aircraft independently after the demise of tsr2 the raf s future jets would be modified us aircraft like the phantom and pan european collaborations like tornado and typhoon in this book the eminent air power analyst and ex vulcan bomber pilot andrew brookes takes a fresh hard headed look at the tsr2 project telling the story of its development short career and cancellation and evaluating how it would have performed in cold war strike roles as well as in the recent wars in the middle east

do you remember the time we used to do new york in three hours even twenty years after its final flight concorde remains the pinnacle of aviation design the aircraft is still unmatched which has led to a vast swathe of material being written about the aeroplane itself however relatively little has been said about the people who designed it concorde a designer s life is an autobiography peppered with anecdotes from the team humorous life stories and several technibits all covering the design period of concorde ted talbot who began his career at bac as an aerodynamicist and later became chief design engineer has combined the technical narrative with personal and family reminiscences to remind the reader that engineers have lives too the path to mach 2 was bumpy with

threats of cancellation and opposition from the americans and the russians but this generally indicated to the concorde team that they were on the right path this informative witty and thoroughly enjoyable peek into an unusual life is a valuable addition to any bookshelf
