c operators w3schools Jan 29 2024 comparison operators are used to compare two values or variables this is important in programming because it helps us to find answers and make decisions the return value of a comparison is either 1 or 0 which means true 1 or false 0 these values are known as boolean values and you will learn more about them in the booleans and if

increment and decrement operators in c

geeksforgeeks Sep 24 2023 last updated 28 aug 2023
the increment and decrement operators in c are
unary operators for incrementing and decrementing
the numeric values by 1 respectively the
incrementation and decrementation are one of the
most frequently used operations in programming for
looping array traversal pointer arithmetic and
