this book expands the sociological canon by introducing non western and female voices and subjects the existing canon itself to critique including chapters on both the founding fathers of sociology and neglected thinkers it highlights the biases of eurocentrism and androcentrism while also offering much needed correctives to them the authors challenge a dominant account of the development of sociological theory which would have us believe that it was only western european and later north american white males in the nineteenth and early twentieth century who thought in a creative and systematic manner about the origins and nature of the emerging modernity of their time this integrated and contextualised account seeks to restructure the ways in which we theorise the emergence of the classical sociological canon this book s global scope fills a significant lacuna and provides a unique teaching resource to students of classical sociological theory

this book is the outcome of an intellectual exercise to understand our post covid society our planet is convalescing from one of the worst pandemics in living memory the whole of 2020 has been sacrificed to combat the iniquities perpetrated by a sub microscopic conglomeration of proteins and nucleic acids a virus that has achieved immortality in the annals of history as sars covid 19 deaths from covid 19 in usa have crossed 405 399 the number of americans who died in the second world war the most important and most far reaching effect has of course been that of isolation lockdown in colloquial usage that term is now probably the most widely understood english word across the inhabited world from the poles to the tropics even in non english speaking countries like china and japan the primary effect of this lockdown has been on the economy from developed to developing countries there are none that may claim to have escaped the paralyzing debilitation caused by an instant and total absence of all forms of commerce long queues in front of provision stores slow starvation as savings dried up people begging for scraps people dying by the roadside and railway tracks as they set out to walk the length and breadth of the country en route to their homes from their places of work all these shocking pictures are now part of our heritage an online society has cropped up as the new normal one sustained by internet apps tweeter and face book and so on it is needless to say that this digital society is the child of no other than the corona virus what is different today is the loss of vision men have distanced themselves not only from their friends but also from their productive energy and sustainable creativity

Economic Crisis and Mentality of Youth in Post-Pandemic Period edited by Sagar Simlandy

indian history and culture are dynamic spanning back to the beginning of human civilization it began with a mysterious culture that flourished along the indus river as well as among the farming communities in the southern lands of india and the history of india is punctuated by constant integration of migrating people with the diverse cultures that surrounded india available evidence suggests that the use of iron copper and other metals was widely prevalent in the indian sub continent at a fairly early period which is indicative of the progress that this part of the world had made by the end of the fourth millennium bc history is the chronological study of the life and civilization of human

beings to develop linkage with the past and the present through continuous dialogues between the experience of past and that of the present is the fundamental mission of history so the historian e h car aptly says that the great writing of history becomes successful only when the search done by the historians illuminates and involves it with the problems of present age the tested truth is that achieving knowledge from the experience of history acts as constant in the different socio economic and political contexts but the approaches to studying history are continuously informed by the changing circumstances and consequently modified from time to time in keeping with the demands of time and space new ideas and views develop in the present and futures times in the light of experiences of history
