a short history of transport in japan from ancient times to the present is a unique study the first by a western scholar to place the long term development of japanese infrastructure alongside an analysis of its evolving political economy drawing from new institutional economics black offers a historically informed critique of contemporary planning using the example of japan s historical institutions their particular biases and the power they have exerted over national and local transport to identify how reformed institutional arrangements might develop more sustainable and equitable transport services with chapters addressing each major form of transport black examines the predominant role of

institutions and individuals from seventeenth century shoguns to post war planners in transforming japan s maritime infrastructure its roads and waterways and its adoption of rail and air transport using a multidisciplinary comparative and chronological approach the book consults a range of technical cultural and political sources to tease out these interactions between society and technology this spirited new contribution to transport studies will attract readers interested in institutional power the history of transport and the development of future infrastructure as well as those with a general interest in japan
