the united nations arms trade treaty became binding international law in late 2014 and although the text of the treaty is a relatively concise framework for assessing whether to authorize or deny proposed conventional weapons transfers by states parties there exists controversy as to the meaning of certain key provisions furthermore the treaty requires a national regulatory body to authorize proposed transfers of conventional weapons covered by the treaty but does not detail how such a body should be established and how it should effectively function the arms trade treaty a commentary explains in detail each of the treaty provisions the parameters for prohibitions or the denial of transfers international cooperation and assistance and implementation obligations and mechanisms as states ratify and implement the treaty over the next few years the commentary provides invaluable guidance to government officials commentators and scholars on the meaning of its contentious provisions this volume describes in detail which weapons are covered by the treaty and explains the different forms of transfer that the arms trade treaty regulates it covers international human rights trade disarmament humanitarian law criminal law and state to state use of force as well as the application of the treaty to non state actors

in a period that began with britain controlling a world wide empire and included two world wars followed by the cold war and massive expenditure on nuclear armaments the relationship between the politicians and the generals has been central to british history while it is correctly assumed that the armed forces have never threatened british political stability in modern times the relationship between the military and their political masters is a major if under emphasised theme of british history while in theory the politicians decided strategy and the military implemented it in practice decisions often depended on the personalities and experience of those involved asquith the epitome of the civilian left major strategic decisions in the hands of the military while churchill an ex soldier and ex first lord of the admiralty rode roughshod over professional military advice in a period when arms before ever more technologically sophisticated there was also the problem of how far politicians could decide on strategies proposed by the military other than by the crude yardstick of cost the essays in government and the armed forces in britain 1856 1990 provide a coherent account not only of the major decision making of warfare but also of the changes in the organisation and control of the armed forces

if you are one of the many people today looking for explanations and possible solutions to the ongoing global financial crisis and global ecological crisis then this book should be on your reading list michael tubbs spent eighteen years as a barrister representing smaller corporations against some of the giant corporations of capital which now dominate the world global economy tubbs was in practice during the collapse of the top down soviet system and its replacement by the equally top down corporatist system tubbs experience forced him to draw the unavoidable conclusion that every corporation of capital is potentially in theory and fact a conspiracy against everything else in society except itself he believes it is time that people understood the role that corporatism has played in bringing the world to its economic and environmental knees he shows how the corporations of capital have gained so much power in society to the detriment of democracy throughout the world while private corporations have exploited our labour and our natural resources for their own greed our governments have failed in their duty of care corporations continue to hide away their profits in tax havens while ordinary citizens bear the brunt of the gfc and gec and no one accepts or apportions blame tubbs argues it is time to take action to lift the corporate veil of secrecy and privilege that protects corporations of capital and to democratise them for the benefit of all

production chemistry issues result from changes in well stream fluids both liquid and gaseous during processing since crude oil production is characterized by variable production rates and unpredictable changes to the nature of the produced fluids it is essential for production chemists to have a range of chemical additives available for rectifying issues that would not otherwise be fully resolved modern production methods the need to upgrade crude oils of variable quality and environmental constraints demand chemical solutions thus oilfield production chemicals are necessary to overcome or minimize the effects of the production chemistry problems production chemicals for the oil and gas industry second edition discusses a wide variety of production chemicals used by the oil and gas industry for down hole and topside applications both onshore and offshore incorporating the large amount of research and applications since the first edition this new edition reviews all past and present classes of production chemicals providing numerous difficult to obtain references especially spe papers and patents unlike other texts that focus on how products perform in the field this book focuses on the specific structures of chemicals that are known to deliver the required or desired performance information that is very useful for research and development each updated chapter begins by introducing a problem such as scale or corrosion for which there is a production chemical the author then briefly discusses all chemical and nonchemical methods to treat the problem and provides in depth descriptions of the structural classes of relevant production chemicals he also mentions when available the environmental properties of chemicals and whether the chemical or technique has been successfully used in the field this edition includes two new chapters and nearly 50 percent more references
