on world cybercities by david harvey saskia sassen and manuel cassels
resisting the temptation to ignore contradictions for the sake of
interpretation ahearn instead offers the reader a view of the modern city
as complex as his subject matter here the methodologies and knowledge
generated by the social sciences are both complemented and subverted
by the experience of city life as portrayed in literature with its diverse
narrative tactics and shifting points of view which can be as disorienting
to the reader as a foreign city is to an arriving immigrant literature
reinforces the importance of method and outlook in the social sciences
ultimately ahearn suggests neither literature nor the social sciences can
capture the experience of urban misery

does god exist the question implies another who is god this book is meant to give an answer to both questions and to give reasons for this answer does god exist yes or no many are at a loss between belief and unbelief they are undecided skeptical they are doubtful about their belief but they are also doubtful about their doubting there are still others who are proud of their doubting yet there remains a longing for certainty certainty whether christians or jews believers in god or atheists the discussion today runs right across old denominations and new ideologies but the longing for certainty is unquenched does god exist we are putting all our cards on the table here the answer will be yes god exists as human beings in the twentieth century we certainly can reasonably believe in god even more so in the christian god and perhaps even more easily today than a few decades or centuries ago for after so many crises it is surprising how much has been clarified and how many difficulties in regard to belief in god have melted into the light that no darkness has

this book critically examines the development of the stirring up hatred offences which are currently found within the uk s public order act 1986 through a critical discourse analysis of key excerpts of parliamentary hansard the book constructs a detailed genealogy of the offences from the perspectives that shaped them a novel application of theory on myth is used to navigate the complex arguments and to trace ideas about identity and order across parliamentary debates from fears of fascism in the 1930s to condemnations of homophobia in the early 21st century the story of the stirring up hatred offences told in this book therefore extends far beyond the traditional frame of a dilemma between regulating hate speech and safeguarding free speech it is inextricably entwined with myths about law race and national identity and speaks to wider themes of coloniality neoliberalism white entitlement british christian exceptionalism and the innocence of law written in an accessible and engaging style this book challenges a wide range of assumptions about hate speech law and raises a series of considerations for developing forms of accountability that are less complicit in the harms that they are supposed to redress
