with the engineering the application of science to the optimum conversion of natural resources to the uses of humankind engineers employ two types of natural resources materials and energy engineers must concern themselves with the continual development of new resources as well as the efficient use of existing ones engineers learn a more general theory of engineering that is easily adaptable to changing practices where as an engineering technologist learns specific practices and devices that can change over time this can lead to an engineering technologist becoming obsolete without retraining to engineer something means to create build or design it as such engineering entails any scientific or technological branch that deals with designing and developing machines engines and other products or structures some types of engineering are subfields of other kinds of engineering 1 rose hulman institute of technology terre haute in 2 franklin w olin college of engineering tie
