4 x 6 pocket size quick reference card with key acs algorithms is included for field use vascular access and medications combined into one chapter to present venous circulation information with all relevant common medications used during a cardiac related emergency 20 1110 literature review from the year 2017 in the subject medicine hospital environment clinical medicine grade 1 egerton university language english abstract over the years the american heart association has made outstanding contributions and numerous improvements to cardiopulmonary resuscitation and advanced cardiac life support guidelines it is due to adequate use of resources and continuous research that millions of lives are saved in the united states such guidelines serve health care providers and other members of the healthcare team as a resource to ensure adequate and timely response to those individuals who experience cardiac or respiratory arrest however according to aha statistics more than 326 000 people in the us suffer out of hospital cardiac arrests each year statistics prove that if more people knew cpr more lives could be saved american heart association 2016 in other words dissemination of knowledge on the matter has direct outcomes on increasing survival rates therefore the guidelines and the implementation methods are on continuous review based on new evidence it is important to provide those who suffer cardiac or respiratory arrest with timely services because delays could end up affecting the outcome of those who experience reversible damage healthcare providers around the world have become informed on the benefits of updated competence and direct patient outcomes and quality of care the american heart association has published the new 2015 cardiopulmonary resuscitation guidelines where changes and updates are reflected in an effort to put the best available evidence in practice the purpose of this review is to compare the 2015 aha updates with historical evidence in an attempt to explicate the implications and limitations of pharmacology in advanced cardiac life support issued with a detached quick reference card has companion bls basic life support provider manual product 151311 product 15 2811 developed out of the authors numerous years of successful classroom instruction to hundreds of students in acs courses this text contains 13 chapters that provide the core information necessary to prepare a candidate for the american heart association s acs provider course concepts are presented in a logical manner that allows the reader to progress from a foundation of basic core knowledge first six chapters to more complex case management material as the chapters progress the information cases and algorithms become more complex requiring integration of the knowledge gained in previous chapters continuous reinforcement is a critical aspect of this book and will give your students not only the understanding necessary to pass acs but also the confidence to use it acs review made incredibly easy 2nd edition covers acs fundamentals including detailed illustrated information on techniques for life support real life case scenarios arrhythmia recognition and treatment defibrillation procedures i v techniques cardiovascular pharmacology myocardial infarction recognition and treatment special resuscitation situations and more features such as an easy to use bulleted format that contains illustrations algorithms and graphics help clarify acs guidelines quick quizzes and a comprehensive test help the student put acs knowledge to the test acs review made incredibly easy 2nd edition will help health care professionals successfully complete the american heart association s aha s advanced cardiac life support acs course and certification exam this quick review study guide summarizes and supplements core concepts contained in the acs course 20 1101 20 1132
