theory the essays collected here explore new analytical models theoretical frameworks and methodological approaches in attempting to reimagine the european renaissance and early modern periods in terms of global expansion awareness and participation centering race in these periods requires that we acknowledge the people against whom social hierarchies and differential treatment were directed this collection takes europe as its focus but white europeans are not centred in it and the experiences of black africans asians jews and muslims are not relegated to the margins of a shared history situating europe within a global context forces the reconsideration of the violence that attends the interaction of peoples both across cultures and enmired within them the less we are attentive to information sharing in a post colonial world new materials and inventions from plastics to the digital to biotechnology have created unprecedented scales of disruption shifting and blurring the categories and meanings of the object if the 20th century demonstrated that humans can be treated like things whilst things can become ever more human where will the 21st century take us the 6 volume set of the cultural history of objects examines how objects have been created used interpreted and set loose in the world over the last 2500 years over this time the west has developed particular cultural history of objects set general editors dan hicks and william whyte on the ethnic relations and politics in post 1978 sri lanka given the diversity and complexity of developments in the twentieth century a history of the christian church in the modern period is in some ways the most challenging volume of all to write but jeremy morris succeeds in presenting a coherent account of the church he emphasises the changing relationship of western churches to the many forms of christianity in other parts of the world while also departing from the eurocentric worldview of previous histories his volume offers three major perspectives the first is political in which the history of the modern church is assessed through a prism of international conflicts and international relations the second perspective is regional in which coverage is given not only to europe and the americas but to christianity in africa the middle east asia the pacific rim and australasia the author s third major perspective is institutional in which he discusses particular christian traditions and their relationships with each other with other faiths and with wider cultures an epilogue evaluates the future and prospects for christianity in the new millennium in this book leading scholars come together to provide a comprehensive wide ranging overview of tragedy in theatre and other media from 1920 to the present the 20th century is often considered to have witnessed the death of tragedy as a theatrical genre but it was marked by many tragic events and historical catastrophes from two world wars and genocide to the proliferation of nuclear weapons and the anticipation and onset of climate change the authors in this volume wrestle with this paradox and consider the degree to which the definitions forms and media of tragedy were transformed in the modern period and how far the

tragic tradition updated in performance still spoke to 20th and 21st century challenges while theater remains the primary focus of investigation in this strikingly illustrated book the essays also cover tragic representation often re mediated fragmented and provocatively questioned in film art and installation photography fiction and creative non fiction documentary reporting political theory and activism since 24 7 news cycles travel fast and modern crises cross borders and are reported across the globe more swiftly than in previous centuries this volume includes intercultural encounters various forms of hybridity and postcolonial tragic representations each chapter takes a different theme as its focus forms and media sites of performance and circulation communities of production and consumption philosophy and social theory religion ritual and myth politics of city and nation society and family and gender and sexuality drawing together scholars with a wide range of expertise across the early modern period this volume explores the rich field of early modern comedy in all its variety it argues that early modern comedy was shaped by a series of cultural transformations that included the emergence of the entertainment industry the rise of the professional comedian extended commentaries on the nature of comedy and laughter and the development of printed jestbooks it was the prime site from which to satirize a rapidly changing world and explore the formation of new social relations around questions of gender authority identity and commerce amongst others yet even as it reacted to the novel and the new comedy also served as a receptacle for the celebration of older social rituals such as may games and seasonal festivities the result was a complex and contested mix of texts performances and concepts providing a deep tradition that abides to this day each chapter takes a different theme as its focus form theory praxis identities the body politics and power laughter and ethics these eight different approaches to early modern comedy add up to an extensive synoptic coverage of the subject in this lively comedy of love and money in sixteenth century venice bassanio wants to impress the wealthy heiress portia but lacks the necessary funds he turns to his merchant friend antonio who is forced to borrow from shylock a jewish moneylender when antonio s business falters repayment becomes impossible and by the terms of the loan agreement shylock is able to demand a pound of antonio s flesh portia cleverly intervenes and all ends well except of course for shylock beginning with the emergence of german language literature on the international stage in the mid eighteenth century the book plays down conventional labels and periodization of german literary history in favour of the explanatory force of international cultural impact it explains for instance how specifically german and austrian conditions shaped major contributions to european literary culture such as romanticism and the language scepticism of the early twentieth century osprey men at arms a celebration is a very special volume detailing some of the wonderful artwork that when men would sleep and an enemy would come and sow tares among the wheat the renaissance the enlightenment and the modern age were just such a time in this second installment the reader will learn how signs and wonders played roles in the foundations of nearly every new state church free church and denomination how catholicism countered with its own reformation that included a revival of mysticism a new army of spiritual soldiers and the discovery of the new world how restorationist movements countered the intellectual revolutions of their day with revivals of faith in the supernatural how a decade long prayer meeting shaped the future of revivalism affecting both england s wesleyan revival and america s first great awakening how the french revolution replaced christianity with liberalism as the world s dominant ideology how many americans countered this new revolution with a second great awakening how phoebe palmer began the modern holiness movement and jeremiah lanphier launched a worldwide laymen s prayer revival how many americans reunited after the civil war with a series of holiness camp meetings followed by a similar higher life movement in britain and later a new stream of american healing ministries in contraception and abortion from the ancient world to the renaissance riddle showed that women in ancient times relied on herbs to regulate fertility in this volume he shows that this ancient knowledge was not lost but survived in coded form in three sections the oxford handbook of the history of medicine celebrates the richness and variety of medical history around the world it explore medical developments and trends in writing history according to period place and theme how do you hook a millennial student into caring about women s issues when feminism has been

declared dead for decades written in an engaging style that promotes critical thinking women s issues for a new generation is intended for freshman and sophomore level undergraduates who have never heard of mary wollstonecraft or anita hill the interdisciplinary text includes three major sections women in the u s women from diverse groups e g native american and disabled and women in the global arena it also stresses the inclusion of men in topics such as body image since women s issues are really issues that affect everyone other striking features included the contemporary debates e g war on women and hillary clinton s ambitions and the current issues such as human trafficking textbooks on gender and women s studies often emphasize theory with the assumption that students already know about women s history the pay gap and other basic information women s issues for a new generation serves as a reader friendly bridge to more advanced analysis of women and gender written by a social worker this textbook applies social work values and the strength perspective to anyone who is fighting gender inequality what does motherhood mean today drawing on interviews with new mothers and intergenerational chains of women in the same family this exciting and timely book documents the transition to motherhood over generations and time exploring amongst other things the trend to later motherhood and the experience of teenage pregnancy a compelling picture emerges becoming a mother is not only a profound moment of identity change but also a site of socio economic difference that shapes women s lives opening a new debate on ethical reasoning after kant drew dalton addresses the problem of the absolute in ethical and political thought attacking the foundation of european philosophical morality he critiques the idea that in order for ethical judgement to have any real power it must attempt to discover and affirm some conception of the absolute good without rejecting the essential role the absolute plays within ethical reasoning dalton interrogates the assumed value of the absolute dalton brings some of the most influential contemporary philosophical traditions into dialogue with each other speculative realists like badiou and meillassoux phenomenologists including husserl heidegger and levinas german idealists especially kant and schelling psychoanalysts freud and lacan and finally post structuralists specifically foucault deleuze and ranciere the relevance of these thinkers to concrete socio political problems is shown through reflections on the holocaust suicide bombings the rise of neo liberalism and neo nationalism as well as rampant consumerism and racism this book re defines ethical reasoning as that which refuses absolutes and resists what milton s devil in paradise lost called the tyranny of heaven against traditional ethical reasoning dalton sees evil not as a moral failure but as the result of an all too easy assent to the absolute an assent which can only be countered through active resistance for dalton resistance to the absolute is the sole channel through which the good can be defined the course of events of the great war has been told many times spurred by an endless desire to understand the war to end all wars however this book moves beyond military narrative to offer a much fuller analysis of of the conflict s strategic political economic social and cultural impact starting with the context and origins of the war including assassination misunderstanding and differing national war aims it then covers the treacherous course of the conflict and its social consequences for both soldiers and civilians for science and technology for national politics and for pan european revolution the war left a long term legacy for victors and vanquished alike it created new frontiers changed the balance of power and influenced the arts national memory and political thought the reach of this account is global showing how a conflict among european powers came to involve their colonial empires and embraced japan china the ottoman empire latin america and the united states this companion provides an overview of european history during the long nineteenth century from 1789 to 1914 consists of 32 chapters written by leading international scholars balances coverage of political diplomatic and intellectual interaction and dialogue with some of the

leading figures in the west including paul tillich hans kung and eugene borowitz as well as dozens of colleagues students and disciples together with the previous volumes this work examines and exemplifies some key features of kyoto school thought while the essays presented here should be read in light of the socio political criticism that has since been lodged against the kyoto school and faceted subject a book on the topic may like many be a description of the physiological steps one takes in performing the process called reading more commonly it is a manual describing the methods a teacher may use in teaching schoolage children to acquire the mechanical aspects of reading some far fewer are focused on the psychology of reading such psychology usually emphasizing the conscious and logical approaches to learning still others are directed toward some particular part of reading in its socio historical setting as for example freedom to read or adult reading habits or variation in trends in the production of materials all books of such nature are relevant to the omnibus topic reading a book which would include reading in its historical sociological and educational setting would indeed be a major undertaking demanding both scope and depth of knowledge from its author frank jennings has written such an inclusive book and he appropriately calls it this is reading this volume suggests a new way of doing global history instead of offering a sweeping and generalizing overview of the past we propose a micro spatial approach combining micro history with the concept of space a focus on primary sources and awareness of the historical discontinuities and unevennesses characterizes the global history that emerges here we use labour as our lens in this volume the resulting micro spatial history of labour addresses the management and recruitment of labour its voluntary and coerced spatial mobility its political perception and representation and the workers own agency and social networks the individual chapters are written by contributors whose expertise covers the late medieval eastern mediterranean to present day sierra leone through early modern china and italy eighteenth century cuba and the malvinas falklands the journeys of a missionary between india and brazil and those of christian captives across the ottoman empire and spain the result is a highly readable volume that addresses key theoretical and methodological questions in historiography chapter 7 is open access under a cc by 4 0 license via link [springer.com](http://springer.com) and world of shifting values following world war i aldous huxley was both a sensitive reflector and an articulate catalyst this work provides a highly illuminating analysis of huxley s evolution from skeptic to mystic as milton birnbaum shows in a perceptive interpretation of huxley s poetry fiction essays and biographies what evolved in huxley s moral and intellectual pilgrimage was not so much a change in direction as a shift in emphasis even in the sardonic huxley of the

1920s and 1930s there is a moral concern in the later huxley there are traces of the satirical skepticism which delighted his readers in the decades preceding world war ii a man of letters a keen observer seeker of new ways while profoundly knowledgeable in the truths of ancient wisdom huxley tried to achieve a symbiotic synthesis of the best of all worlds in clarifying and interpreting huxley s intellectual moral and philosophical development birnbaum touches upon all the subjects that came under the scrutiny of a singularly encyclopedic mind this book is of great worth to those interested both in huxley the brilliant satirist and in huxley the seeker of salvation in his search huxley typified the modern quest for values milton birnbaum s study is an invaluable guide in that journey his new introduction takes account of research and analysis of huxley that has occurred since this book s original publication milton birnbaum is the retired dean of the school of arts and sciences and professor of english at american international college he has contributed articles on english and american literature to many journals and has published satiric articles in the chronicle of higher education under the logo of higher education eh the nineteen original articles written by medieval scholars fill a gap in the field s scholarship which has ignored sexuality as a topic building on the groundbreaking work of michel foucault s history of sexuality the essays consider ignored research work and bring fresh insights to the culture history and literature of the middle ages the writings focus on sexual norms homosexuality lesbianism prostitution and sexuality in the context of christian judaic and islamic religious practices c book news inc historian philosopher critic playwright journalist and actor egon friedell was a key figure in the extraordinary flowering of viennese culture between the two world wars his masterpiece a cultural history of the modern age demonstrates the intellectual universality that friedell saw as guarantor of the continuity and regeneration of european civilization following a brilliant opening essay on cultural history and why it should be studied the first volume begins with an analysis of the transformation of the medieval mind as it evolved from the black death to the thirty years war the emphasis is on the spiritual and cultural vortex of civilization but friedell never forgets the european roots in pestilence death and superstition that animate a contrary drive toward reason refinement intellectual curiosity and scientific knowledge while these values reached their apogee during the renaissance friedell shows that each cultural victory is precarious and europe was always in danger of slipping back into barbarism friedell s historical vision embraces the whole of western culture and its development it is a consistent probing for the divine in the world s course and is therefore theology it is research into the basic forces of the human soul and is therefore psychology it is the most illuminating presentation of the forms of state and society and therefore is politics the most varied collection of all art creations and is therefore aesthetics thomas mann regarded friedell as one of the great stylists in the german language like the works of the great novelist a cultural history of the modern age offers a dramatic history of the last six centuries showing the driving forces of each age the new introduction provides a fascinating biographical sketch of friedell and his cultural milieu and analyzes his place in intellectual history temporal divergence creates a need for new narratives and paradigms in diverging time david carvounas supports this assertion through detailed expository and diagnostic readings of kant hegel and marx he focuses on their contribution to our understanding of modernity as an epochal shift in the relationship between past and future recasting the significance of the past and future of the modern present despite their different solutions to the problem of temporal coordination they urged the modern world to look not to the past but to the newly opened future for continuity meaning and purpose this book not only offers a fresh look at a defining characteristic of modernity but also makes a compelling case that a coherent modern temporal structure requires a sustainable orientation toward the future an orientation that kant hegel and marx delineate in distinctive and powerful ways hermeneutics was elaborated as a specific art of understanding in humanities the discovered paradigmatic historical characteristics of scientific knowledge and the role of rhetoric interpretation and contextuality enabled us to use similar arguments in natural sciences too in this way a new research field the hermeneutics of science emerged based upon the works of husserl merleau ponty heidegger and gadamer a dialogue between philosophers and scientists begins in this volume on hermeneutic approaches to physics biology ethology mathematics and cognitive science scientific principles methodologies discourse language and metaphors are analyzed as well as the role of the lay public and the legitimation of science different hermeneutical phenomenological approaches to perception experiments methods discovery and justification and the genesis of science are presented hermeneutics shed a new light on the incommensurability of paradigms the possibility of

translation and the historical understanding of science divexplores the profound cultural transformations triggered by spain s efforts to colonize the andean region and demonstrates the continuing influence of the inquisition to the present day div the self and the sonnet is an interdisciplinary study which considers the sonnet a near eight hundred year old form and looks at the historical meanderings and the popularity of the form among cultures that are far removed from the location of its origin in italy the book tracks the notion of the self from its platonic beginnings to the postmodern using insights from charles taylor brian morris and calvin o schrag so as to work out a model of the self jan patočka s phenomenological notions of the self and chaos theory are important cohesive elements in the composition of this model a limit point in mathematics is a point that is not in the set around which all the points cluster the book looks at the self from the limit points of the body mind world and language it analyzes sonnets which predominantly show a tendency to one of these limit points however it keeps in mind the other limit points as possibilities of a comprehensive analysis the motivation for this body of research comes primarily from the notion of the sonnet being a form that initially exists along with the epic as canonical writers of literary epics also write sonnets the historic and narrative moment of self in sonnet form calls for a questioning of both the self and the sonnet the book tries to address the questions what changes in the notion of self prompt the origin and persistence of the sonnet across cultures and why and how is this form compatible with a self that is postmodern and global the anglo american sonnet for the most is addressed but cultures and their attendant forms are also addressed when considering the sonnet the arabic zajal the persian ghazal the chinese sonnet and the korean sijo sonnet are forms that are touched upon along with the indian postcolonial versions like the forms of the sonnet in modern indian languages such as bangla gujarati and marathi

opening a new debate on ethical reasoning after kant drew dalton addresses the problem of the absolute in ethical and political thought attacking the foundation of european philosophical morality he critiques the idea that in order for ethical judgement to have any real power it must attempt to discover and affirm some conception of the absolute good without rejecting the essential role the absolute plays within ethical reasoning dalton interrogates the assumed value of the absolute dalton brings some of the most influential contemporary philosophical traditions into dialogue with each other speculative realists like badiou and meillassoux phenomenologists including husserl heidegger and levinas german idealists especially kant and schelling psychoanalysts freud and lacan and finally post structuralists specifically foucault deleuze and ranciere the relevance of these thinkers to concrete socio political problems is shown through reflections on the holocaust suicide bombings the rise of neo liberalism and neo nationalism as well as rampant consumerism and racism this book re defines ethical reasoning as that which refuses absolutes and resists what milton s devil in paradise lost called the tyranny of heaven against traditional ethical reasoning dalton sees evil not as a moral failure but as the result of an all too easy assent to the absolute an assent which can only be countered through active resistance for dalton resistance to the absolute is the sole channel through which the good can be defined

in the moral vacuum and world of shifting values following world war i aldous huxley was both a sensitive reflector and an articulate catalyst this work provides a highly illuminating analysis of huxley's evolution from skeptic to mystic as milton birnbaum shows in a perceptive interpretation

of huxley s poetry fiction essays and biographies what evolved in huxley s moral and intellectual pilgrimage was not so much a change in direction as a shift in emphasis even in the sardonic huxley of the 1920s and 1930s there is a moral concern in the later huxley there are traces of the satirical skepticism which delighted his readers in the decades preceding world war ii a man of letters a keen observer seeker of new ways while profoundly knowledgeable in the truths of ancient wisdom huxley tried to achieve a symbiotic synthesis of the best of all worlds in clarifying and interpreting huxley s intellectual moral and philosophical development birnbaum touches upon all the subjects that came under the scrutiny of a singularly encyclopedic mind this book is of great worth to those interested both in huxley the brilliant satirist and in huxley the seeker of salvation in his search huxley typified the modern quest for values milton birnbaum s study is an invaluable guide in that journey his new introduction takes account of research and analysis of huxley that has occurred since this book s original publication milton birnbaum is the retired dean of the school of arts and sciences and professor of english at american international college he has contributed articles on english and american literature to many journals and has published satiric articles in the chronicle of higher education under the logo of higher education eh

historian philosopher critic playwright journalist and actor egon friedell was a key figure in the extraordinary flowering of viennese culture between the two world wars his masterpiece a cultural history of the modern age demonstrates the intellectual universality that friedell saw as guarantor of the continuity and regeneration of european civilization following a brilliant opening essay on cultural history and why it should be studied the first volume begins with an analysis of the transformation of the medieval mind as it evolved from the black death to the thirty years war the emphasis is on the spiritual and cultural vortex of civilization but friedell never forgets the european roots in pestilence death and superstition that animate a contrary drive toward reason refinement intellectual curiosity and scientific knowledge while these values reached their apogee during the renaissance friedell shows that each cultural victory is precarious and europe was always in danger of slipping back into barbarism friedell s historical vision embraces the whole of western culture and its development it is a consistent probing for the divine in the world s course and is therefore theology it is research into the basic forces of the human soul and is therefore psychology it is the most illuminating presentation of the forms of state and society and therefore is politics the most varied collection of all art creations and is therefore aesthetics thomas mann regarded friedell as one of the great stylists in the german language like the works of the great novelist a cultural history of the modern age offers a dramatic history of the last six centuries showing the driving forces of each age the new introduction provides a fascinating biographical sketch of friedell and his cultural milieu and analyzes his place in intellectual history

temporal divergence creates a need for new narratives and paradigms in diverging time david

carvounas supports this assertion through detailed expository and diagnostic readings of kant hegel and marx he focuses on their contribution to our understanding of modernity as an epochal shift in the relationship between past and future recasting the significance of the past and future of the modern present despite their different solutions to the problem of temporal coordination they urged the modern world to look not to the past but to the newly opened future for continuity meaning and purpose this book not only offers a fresh look at a defining characteristic of modernity but also makes a compelling case that a coherent modern temporal structure requires a sustainable orientation toward the future an orientation that kant hegel and marx delineate in distinctive and powerful ways
