Getting to the Bottom of Top 2017-12-07

phenomenology in the united states is in a state of ferment and change not all the changes are happy ones however for some of the most prominent philosophers of the first generation of phenomenologists have died in 1959 alfred schutz and within the past two years john wild dorion cairns and aron gur witsch these thinkers though often confronting a hostile intellectual climate were nevertheless persistent and profoundly influential through their own works and through their students the two sources associated with their names the graduate faculty of the new school for social research and the circle around john wild first at harvard and later at northwestern and yale produced a sizable portion of the now second generation american phenomenological philosophers in a way it was the very hostility of the american philosophical milieu which became an important factor in the ferment now taking place although the older first generation phenomenologists were deeply conversant with other philosophical movements here and abroad their efforts at meaningful dialogue were largely ignored determined not to remain isolated from the dominant currents of anglo

american philosophy in particular the second generation opened the way to a dialogue with analytic philosophers especially through the efforts of the society for phenomenology and existential philosophy led by 2 introduction such men as james m edie and hubert dreyfus and in other respects herbert spiegelberg and maurice natanson

A Phenomenology of Institutions 2018-08-06

planning in this century has been largely influenced by the appeal of scientific activity on the one hand and by reform movements on the other as a result of this influence two roles of planning developed with one predominating an advisory role which adheres to the scientific canon of detached objectivity and which is the prevailing version and an active role where intervention into the development of society is promoted this duality creates problems for planning theory and practice especially since the positivist foundation of planning has proven to be inadequate an examination of logical positivism indicates that a correct social theory can only be critical this suggests that planning should use critical theory as new epistemological framework

Phenomenology 1974

this book introduces phenomenology to reveal how the atmosphere and relationships in the workplace are generated and how this affects creativity in their daily work people sometimes feel that today s meeting was more exciting than expected or that everyone s motivation is down this unspoken workplace atmosphere has a significant impact on their work but has enough thought been given to how this workplace atmosphere is created phenomenology reveals the basic structure of human relationships in the workplace are there any general rules that govern human interaction and the nature of relationships in that workplace if these unspoken rules can be made explicit clearly felt and spoken people can work together to bring about a creative workplace in which individuals can maximize their abilities the main point of the book is that human relationships are based on a two layered structure emotional communication which is rooted in human sensitivity and centers on sensation and emotion

and verbal communication which is based on shared intelligence and relies upon language and thought the invisible layer of emotional communication is always at work as the foundation of verbal communication creating what can be described as the workplace atmosphere this book offers a new perspective on promoting creativity in the workplace by unraveling the principles behind the structure of workplace atmospheres
