

# Free read Information technology it asset management itam Copy

Information technology (IT) asset management (ITAM) is the end-to-end tracking and management of IT assets to ensure that every asset is properly used, maintained, upgraded, and disposed of at the end of its lifecycle. ITAM involves using financial, contractual, and inventory data with management tools to track and make strategic decisions about IT assets.

ITAM is the process of ensuring an organization's assets are accounted for, deployed, maintained, upgraded, and disposed of when the time comes. Put simply, ITAM is making sure that the valuable items (tangible and intangible) in your organization are tracked and being used.

ITAM is the end-to-end tracking and management of IT assets to ensure that every asset is properly used, maintained, upgraded, and disposed of at the end of its lifecycle. ITAM involves using financial, contractual, and inventory data to track and make strategic decisions about IT assets.
