the french sociologist Émile durkheim is commonly cited as the father of sociology principle to the work of durkheim was his concern with regard to how modernity was effecting traditional social and religious institutions more specifically with how societies could maintain their integrity and coherence in an era in which new social institutions were coming into being one of his principles works the elementary forms of religious life is a comparative theory of the religious lives of ancient and modern societies and the sociological influence of their respective religious institutions durkheim argues that the essence of religion is the concept of the sacred and it is this single phenomenon that is common to all religions the work extensively discusses the concept of the sacred by examining the worship of totems in ancient religions and by arguing that modern societies have displaced this totemism by ascribing a new form of sacredness to the individual and individual rights the elementary forms of religious life is a compelling exposition on the impact of religious institutions in ancient and modern life and a worthy read for anyone interested in religious or sociological studies this edition is printed on premium acid free paper

in this original and controversial book professor rawls argues that durkheim s the elementary forms of religious life is the crowning achievement of his sociological endeavour and that since its publication in english in 1915 it has been consistently misunderstood rather than a work on primitive religion or the sociology of knowledge rawls asserts that it is an attempt by durkheim to establish a unique epistemological basis for the study of sociology and moral relations by privileging social practice over beliefs and ideas it avoids the dilemmas inherent in philosophical approaches to knowledge and morality that are based on individualism and the tendency to privilege beliefs and ideas over practices both tendencies that dominate western thought based on detailed textual analysis of the primary text this book will be an important and original contribution to contemporary debates on social theory and philosophy

## ***Emile Durkheim 2005***

this study of durkheim seeks to help the reader to achieve a historical understanding of his ideas and to form critical judgments about their value to some extent these tow aims are contradictory on the one hand one seeks to understand what did durkheim really mean how did he see the world how did his ideas related to one another and how did they develop how did they related to their biographical and historical context how were they received what influence did they have and to what criticism were they subjected what was it like not to make certain distinctions not to see certain errors of fact or of logic not to know what has subsequently become known on the other hand one seeks to assess how valuable and how valid are the ideas to what fruitful insights and explanations do they lead how do they stand up to analysis and to the evidence what is their present value yet it seems that it is only by inducing oneself not to see and only by seeing them that one can make a critical assessment the only solution is to pursue both aims seeing and not seeing simultaneously more particularly this book has the primary object of achieving that sympathetic understanding without which no adequate critical assessment is possible it is a study in intellectual history which is also intended as a contribution to sociological theory

excerpt from the elementary forms of the religious life a study in religious sociology in this book we propose to study the most primitive and simple religion which is actually known to make an analysis of it and to attempt an explanation of it a religious system may be said to be the most primitive which we can observe when it fulfils the two following conditions in the first place when it is found in a society whose organization is surpassed by no others in simplicity and secondly when it is possible to explain it without making use of any element borrowed from a previous religion we shall set ourselves to describe the organization of this system with all the exactness and fidelity that an ethnographer or an historian could give it but our task will not be limited to that sociology raises other problems than history or ethnography it does not seek to know the passed forms of civilization with the sole end of knowing them and reconstructing them but rather like every positive science it has as its object the explanation of some actual reality which is near to us and which consequently is capable of affecting our ideas and our acts this reality is man and more precisely the man of to day for there is nothing which we are more interested in knowing than we are not going to study a very archaic religion simply for the pleasure of telling its peculiarities and its singularities about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
