this technical report presents the outcome of a working group that was established to determine broadly applicable sound exposure guidelines for fishes and sea turtles after consideration of the diversity of fish and sea turtles guidelines were developed for broad groups of animals defined by the way they detect sound different sound sources were considered in terms of their acoustic characteristics

and appropriate metrics defined for measurement of the received levels the resultant sound exposure guidelines are presented in a set of tables in some cases numerical guidelines are provided expressed in appropriate metrics when there were insufficient data to support numerical values the relative likelihood of effects occurring was evaluated although the actual likelihood of effects depends on the received level these sound exposure guidelines which are based on the best scientific information at the time of writing should be treated as interim the expectation is that with more research the guidelines can be refined and more cells in the tables completed recommendations are put forward defining the research requirements of highest priority for extending these interim exposure guidelines

Clinical Cardiology: Current Practice Guidelines

2016-07-21

background latent tuberculosis infection ltbi defined as a state of persistent immune response to prior acquired mycobacterium tuberculosis antigens without evidence of clinically manifested active tb affects about one third of the world s population approximately 10 of people with ltbi will develop active tb disease in their lifetime with the majority developing it within the first five years after initial infection currently available treatments have an efficacy ranging from 60 to 90 systematic testing and treatment of ltbi in at risk populations is a critical component of who s eight point framework adapted from the end tb strategy to target pre elimination and ultimately elimination in low incidence countries overview recognizing the importance of expanding the response to ltbi in 2014 who developed guidelines on the management of latent tuberculosis infection the guidelines are primarily targeted at high income or upper middle income countries with an estimated tb incidence rate of less than 100 per 100 000 population because they are most likely to benefit from it due to their current tb epidemiology and resource availability the overall objective of the guidelines is to provide public health approach guidance on evidence based practices for testing treating and managing ltbi in individuals with the highest risk of progression to active disease specific objectives include identifying and prioritizing at risk population groups for targeted intervention of ltbi

testing and treatment including defining an algorithm and recommending specific treatment options the guidelines are expected to provide the basis and rationale for the development of national guidelines for Itbi management based on available resources epidemiology of tb including intensity of transmission the health care delivery system of the country and other national and local determinants

a two time ajn book of the year award winner and a 2013 doody core title this distinguished text provides top tier guidance for advanced practice nurses on how to perform a comprehensive systematic review of available research to inform scholarly work particularly in dnp and phd programs with a strategic focus on the search process and assessing the quality of the evidence this text presents clearly and comprehensively all of the knowledge and skills necessary to conduct a foundational csr in eight concrete steps this text examines how to write a csr proposal final report and a policy brief based on systematic review findings two finished proposals and two completed systematic reviews demonstrate each step of the process from start to finish additionally the text covers software used in research queries and provides helpful strategies for effectively using the search function when seeking information the third edition offers four new chapters with incisive recommendations for performing a csr and addressing new ways csr is being implemented in today s healthcare environment it describes the latest methodological advances including living systematic reviews and dominance scores for economic review two complete csrs along with new and updated examples throughout the book further aid readers in their pursuit of excellence in scholarly work new to the third edition new chapters how to choose the right critical appraisal tool writing the final report and disseminating the results of systematic reviews disseminating results with how to write a policy brief and or press release on csr results example of a meta analysis using grade offers increased focus on dissemination includes new and updated examples reflecting latest trends in nursing scholarly work key features provides the knowledge and skills necessary to conduct a csr from start to finish teaches readers how to conduct high quality systematic reviews instructs readers on pertinent resources and methods for optimal library related systematic review research efforts describes how to best search research databases to facilitate scholarly work includes objectives summary points end of chapter exercises discussion questions suggested reading and references to enhance understanding

United States Sentencing Commission Guidelines Manual 2013-2014

2014-03-08

this 14th annual report on the oecd guidelines for multinational enterprises

describes the activities undertaken to promote the observance of the guidelines during the implementation cycle of June 2013 to June 2014. This includes work on due diligence in the financial and extractive sectors as well as along agricultural supply chains, strengthened co-operation with non-adhering countries, the outcomes of the 2nd global forum on responsible business conduct as well as the activities of national contact points who promote the observance of the guidelines principles and standards in the 46 adhering countries.

Guidelines on the Management of Latent Tuberculosis Infection

2015-01-15

The guidelines manual is effective November 1, 2013 to October 31, 2014. The 2013 amendments include some substantive, clarifying and technical revisions to guidelines, policy statements and commentary as an aid to the reader in considering departures under the guidelines. The guidelines manual includes a list of departure provisions. The list appears at the back of the book after the official statutory index, appendix A, and the general index for this edition. The general index has been redesigned to provide more references for more terms and generally make it easier to read, understand and use. Appendix B, containing the principal statutory provisions governing sentencing as of May 1, 2013, is set forth in a separate volume that volume is also enclosed. Appendix C sets forth guideline amendments and the accompanying reasons for amendment. Please take time to read the reasons for amendment when considering the amendments. A new supplement to appendix C, containing guideline amendments effective November 1, 2012 and November 1, 2013, is included. You should already have volumes I through III containing guideline amendments effective November 1, 1987 through November 1, 2011 and the reasons for those amendments.

Navigating the CMS website to find accurate Medicare and Medicaid hospital regulations is a difficult and confusing task and printing out hundreds of pages is costly and time consuming. HCPro has taken the most recent version of CMS conditions of participation and the corresponding interpretive guidelines and reprinted them in an easy to use format. Among the changes to the COPs in 2014 are final rules that clarify hospital medical staff composition, allow registered dietitians to receive hospital privileges to order patient diets, no longer require hospital governing bodies to include medical staff members, allow practitioners to order hospital outpatient services for their patients.
