Collaborative Governance and Public Innovation in Northern Europe *2015-04-06*

governments all over northern europe have placed public innovation high on the political agenda and pursuing public innovation through multi actor collaboration such as public private partnerships and governance networks appears to have particular potential collaborative governance and public innovation in northern europe draws up the

emergent field of collaborative public innovation research and presents a series of cutting edge case studies on collaborative forms of governance and public innovation in northern europe the edited volume offers scholarly reflections empirical testimonies and learning perspectives on recent transformations of governance and the way in which new public policies services and procedures are formulated realized and diffused through the empirical case studies the book discusses some of the wider political and social drivers barriers promises and pitfalls of collaborative public innovation initiatives in some european nations collaborative governance and public innovation in northern europe will stimulate debates among scholars and decision makers on how new forms of collaborative governance might enhance the capacity for public innovation and help in developing solutions to some of the most acute and wicked governance problems of our time

Advances in Human Aspects of Road and Rail Transportation *2012-07-17*

human factors and ergonomics have made considerable contributions to the research design development operation and analysis of transportation systems and their complementary infrastructure this volume focuses on the causations of road accidents the function and design of roads and signs the design of automobiles and the training of the driver it covers accident analyses air traffic control control rooms intelligent transportation systems and new systems and technologies

Assistive Technology *2015-08-27*

assistive technology at is the term used to describe products or technology based services which support those with disabilities or other limitations to their daily activities enabling them to enjoy a better quality of life this book presents the proceedings of the 13th european conference on the advancement of assistive technology aaate 2015 held in budapest hungary in september 2015 this biennial conference has established itself as a leading forum in the transdisciplinary area of assistive technology providing a unique platform for the gathering of experts from around the world to review progress and challenges in the interdisciplinary fields which contribute to at such as research development manufacturing supply provision and policy the theme of the 2015 conference is attracting new areas and building bridges and this book contains 138 reviewed papers and 28 poster presentations delivered at the conference covering at themes as diverse as aging blindness mobility assisted living and accessibility for people with dementia and cognitive impairment offering a current overview of many aspects of at this book will be of interest to all those from researchers and manufacturers to healthcare professionals and end users whose work or daily life involves the relationship between technology and disability

Evolutionary Paths Towards the Mobility Patterns of the Future *2013-09-26*

this edited volume presents new insights and challenges in the field

of electric mobility in relation to new mobility and infrastructure concepts as well as to renewable energies the book covers the socio economic view on the topic as well as technical aspects and thus offers valuable knowledge for future business models it primarily addresses practitioners and researchers in the field but may also be of use to graduate students

Design, User Experience, and Usability: Interactive Experience Design *2015-07-20*

the three volume set lncs 9186 9187 and 9188 constitutes the proceedings of the 4th international conference on design user experience and usability duxu 2015 held as part of the 17th international conference on human computer interaction hcii 2015 in los angeles ca usa in august 2015 jointly with 13 other thematically similar conferences the total of 1462 papers and 246 posters presented at the hcii 2015 conferences were carefully reviewed and selected from 4843 submissions these papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems the papers accepted for presentation thoroughly cover the entire field of human computer interaction addressing major advances in knowledge and effective use of computers in a variety of application areas the total of 132 contributions included in the duxu proceedings were carefully reviewed and selected for inclusion in this three volume set the 64 papers included in this volume are organized in topical sections on designing the social media experience designing the learning experience designing the playing experience designing the urban

experience designing the driving experience designing the healthcare patient s experience and designing for the healthcare professional s experience

Future Challenges in Security and Privacy for Academia and Industry *2011-05-24*

this book constitutes the refereed proceedings of the 26th ifip tc 11 international information security conference sec 2011 held in lucerne switzerland in june 2011 the 24 revised full papers presented together with a keynote talk were carefully reviewed and selected from 100 submissions the papers are organized in topical sections on malware information flow and dos attacks authentication network security and security protocols software security policy compliance and obligations privacy attacks and privacy enhancing technologies risk analysis and security metrics and intrusion detection

Driver Acceptance of New Technology *2014-02-28*

acceptance of new technology and systems by drivers is an important area of concern to governments automotive manufacturers and equipment suppliers especially technology that has significant potential to enhance safety to be acceptable new technology must be useful and satisfying to use if not drivers will not want to have it in which case it will never achieve the intended safety benefit even if they have the technology drivers may not use it if it is deemed unacceptable or may not use it in the manner intended by the

designer at worst they may seek to disable it this book brings into a single edited volume the accumulating body of thinking and research on driver and operator acceptance of new technology bringing together contributions from international experts from around the world the editors have shaped a book that covers the theory behind acceptance how it can be measured and how it can be improved case studies are presented that provide data on driver acceptance of a wide range of new and emerging vehicle technology although driver acceptance is the central focus of this book acceptance of new technology by operators in other domains and across cultures is also investigated similarly perspectives are derived from domains such as human computer interaction where user acceptance has long been regarded as a key driver of product success this book comes at a critical time in the history of the modern motor vehicle as the number of new technologies entering the modern vehicle cockpit rapidly escalates the goal of this book is to inspire further research and development of new vehicle technology to optimise user acceptance of it and in doing so to maximise its potential to be useful satisfying to use and able to save human life

Meeting the Needs of Student Users in Academic Libraries *2012-10-04*

meeting the needs of student users in academic libraries surveys and evaluates the current practice of learning commons and research services within the academic library community in order to determine if these learning spaces are functioning as intended to evaluate their findings the authors examine the measurement tools

that libraries have used to evaluate usage and satisfaction including contemporary anthropological studies that provide a more detailed view of the student s approach to research the book takes a candid look at these redesigns and asks if improvements have lived up to expectations of increased service and user satisfaction are librarians using these findings to inform the evolution and implementation of new service models or have they simply put a new shade of lipstick on the pig takes an honest look at learning commons in academic libraries and discusses what is working and what is not explores behind the statistics as to why users come to the library does the librarians concept of the library as place match user perception looks at the anthropology of the user to gauge satisfaction with the services and space provided by the library via recent survey findings

Advances in Human Factors and Ergonomics 2012- 14 Volume Set *2012-08-06*

with contributions from an international group of authors with diverse backgrounds this set comprises all fourteen volumes of the proceedings of the 4th ahfe conference 21 25 july 2012 the set presents the latest research on current issues in human factors and ergonomics it draws from an international panel that examines cross cultural differences design issues usability road and rail transportation aviation modeling and simulation and healthcare

Social Informatics *2011-10-07*

this book constitutes the proceedings of the third international conference on social informatics socinfo 2011 held in singapore in

october 2011 the 15 full papers 8 short papers and 13 posters included in this volume were carefully reviewed and selected from 68 full paper and 13 poster submissions the papers are organized in topical sections named network analysis egovernance and knowledge management applications of network analysis community dynamics case studies trust privacy and security peer production

Routing in Opportunistic Networks 2013-09-10

routing in opportunistic networks focuses on the basics of opportunistic networks modeling and communication in opportunistic networks routing in opportunistic networks and collaboration and cooperation in opportunistic networks the editors will cover such topics as mobility characterization and discovery in opportunistic networks scheduling and medium access control in opportunistic networks as well as testbed tools and measurements for opportunistic networks

Objective Question Bank of Computer Awareness for General Competitions 2018-04-20

in a technology driven world basic knowledge and awareness about computers is a must if we wish to lead a successful personal and professional life today computer awareness is considered as an important dimension in most of the competitive examinations like ssc bank po clerk it officer upsc other state level pscs etc objective questions covering computer awareness are asked in a number of

competitive exams so the present book which will act as an objective question bank for computer awareness has been prepared keeping in mind the importance of the subject this book has been divided into 22 chapters covering all the sections of computer awareness like introduction to computer computer organisation input output devices memory software ms office database internet networking computer security digital electronics etc the chapters in the book contain more than 75 tables which will help in better summarization of the important information with a collection of more than 3500 objective questions the content covered in the book simplifies the complexities of some of the topics so that the non computer students feel no difficulty while studying various concepts covered under computer awareness section this book contains the most streamlined collection of objective questions including questions asked in competitive examinations upto 2014 as the book thoroughly covers the computer awareness section asked in a number of competitive examinations it for sure will work as a preparation booster for various competitive examinations like upsc state level pscs examinations ssc bank po clerk it officer and other general competitive recruitment examinations

Sustainable Tourism in the Social Media and Big Data Era 2020-11-13

the aim of this special issue is to examine the current major topics concerning the use of social media and big data in sustainable tourism practices and to encourage interdisciplinary discussion among researchers regarding these issues this special issue covers all relevant areas of the debate including 15 selected papers based on the following

core ideas smart tourism and big data social media in the tourism industry and online reviews and tourist behaviors this special issue discusses wide ranging topics and research questions with regard to the smart tourism city the impact of social media online reviews and tourist behaviors and it represents a call to action for scholars to engage with broader social issues

A User's Guide to Patents 2019-07-12

a user s guide to patents fifth edition provides guidance on the areas of european and uk patent law and procedure that are most important in day to day practice this new edition sets out how patents can be obtained exploited and enforced and addresses wider public policy aspects of patents and their economic significance as well as past and likely future trends that affect legal practitioners it is essential reading for ip practitioners solicitors and barristers patent attorneys in house lawyers management executives and inventors unique selling points explains how patents can be exploited and enforced by reference to the most recent uk and epo case law identifies and discusses the different patent law issues that can arise in specific industrial sectors full tabulation of all english patent validity and infringement decisions given after full trial since 1997 addresses wider public policy aspects of patents and their economic significance as well as past and likely future trends in the field both in europe and internationally the following relevant developments are included the new uk law as to infringement by equivalents following actavis v lilly uksc 2017 the degree to which new types of plant produced by using certain modern biotechnological techniques can be patented in the light of the exclusion for products obtained by essentially biological processes and

the ongoing controversy as to this between the epo the epo boards of appeal and the eu the developing case law in the uk and the epo on plausibility in the context of insufficiency and obviousness the unjustified threats act 2017 and other procedural developments such as those involving arrow type declarations of obviousness developments in standards related patent litigation as in unwired planet v huawei patents court 2017 ca 2018

Universal Access in Human-Computer Interaction: User and Context Diversity
