Catalog of Copyright Entries. Third Series 1957

this volume presents new philosophical essays on a topic that s been neglected in most recent philosophy games sports and play some contributions address conceptual questions about what games and sports have in common and that distinguishes them from other activities here many take their start from bernard suits s celebrated analysis of game playing in his book the grasshopper and either elaborate it or propose an alternative to it other essays discuss normative issues that arise within games and sports such as about fairness for example in the treatment of male and female athletes yet others consider broader evaluative questions about the value of games and sports which some see as enabling the display of distinctive excellences games sports and play includes a posthumous essay by suits defending his claim in the grasshopper that life in utopia would consist primarily in playing games the volume s chapters approach the topic of games sports and play from different angles but always in the belief that there is rich terrain here for philosophical investigation

British Books 1959

from the author of the bestselling atlantis comes a thrilling novel of buried secrets age old mysteries and a conspiracy surrounding the fabled ark of the covenant what do you get if you cross indiana jones with dan brown answer david gibbins mirror 586 bc the ancient world is in meltdown the babylonians have ravaged the holy land and jerusalem has fallen in desperation the temple priests look to the greatest navigators ever known to save their holiest of treasures 1943 a group of allied codebreakers under churchill s direct command work to stop a top secret exchange between the nazis and the japanese yet even they know nothing of the ancient artefact hidden on board a ship whose fate they have just sealed present day marine archaeologist jack howard and his friend costas undertake a dangerous dive hunting for nazi gold in a wreck perched on the edge of the continental shelf what they glimpse there leads jack to piece together the truth of one of the greatest ancient voyages of discovery one whose real purpose

he could scarcely have imagined jack must fuse past and present as he never has done before in a terrifying final showdown on a desperate mission for humanity

British Ceramic Abstracts 1966

how do ecological and evolutionary factors maintain the balance of diverse species including humans in an ecosystem with examples ranging from bhutan to california christopher wills explains the processes he also presents striking evidence that human populations have adapted genetically to environments

Serious Leisure and Nature 2011-03-01

shine a light into the unknown there are still dark corners of our planet that are yet to be explored in this remarkable book steve backshall offers an unflinching account of his adventures into these uncharted territories around the globe in search of world firsts each location brings its own epic challenges whether it s the first climb of an arctic ice fall in greenland the first recorded navigation of a south american river or the first exploration of the world s longest cave system in mexico but all of them represent new tests of the limits of human endeavour accompanying a major 10 part series on bbc and dave expedition is a breathtaking journey into the unknown and a brilliantly written celebration of the pleasures of genuine discovery
