the journal of physical chemistry letters
clinical chemistry is a high impact peer reviewed publication ranked as the most cited journal in the fields of clinical chemistry clinical or anatomic pathology analytical chemistry transfusion medicine and clinical microbiology
2024 developing cost effective electrocatalysts for the oxygen evolution reaction oer in proton exchange membrane pem water electrolysis is crucial to achieving large scale hydrogen production through water electrolysis here we propose the utilization of a compound er_2o_3 to enhance the catalytic performance
sodium ion batteries sibs are expected to replace lithium ion batteries libs as the next promising recharge batteries due to the abundant distribution and low cost of sodium resources exploring a suitable anode material is very important to achieve its commercialization tin disulfide sns_2 as a promising
polybenzoxazine pbz emerges as a cutting edge high performance thermosetting resin boasting a broad spectrum of applications in electrician friction materials and aerospace industries due to its outstanding features such as exceptional thermal stability mechanical properties flexible molecular design
the synthesis of biobased polyesters based on 2,5-bis(hydroxymethyl) furan bhmf is challenging due to the limited stability of this interesting furanic monomer in this work a series of bhmf based polyesters were produced via a green and efficient bulk polymerization process by using either an enzyme
