Teaching Manual and Industrial Arts, a Textbook for Normal Schools and Colleges

1924

excerpt from teaching manual and industrial arts a textbook for normal schools and colleges the homely story of the blind men and the elephant well illustrates the attitude one is likely to assume with reference to the beliefs of others educationally unless he studies discerningly the reader will recall that the blind man who happened to grasp the elephant s ear concluded that elephants were like palm leaf fans the one who touched the elephant s side concluded that an elephant was like the side of a wall the one who grasped the elephant s tail thought elephants were like rope while the one who happened to clasp his arms about the elephant s leg was certain elephants were like tree trunks each was right in so far as he had informed himself of a part of the body he was wrong in his hasty or impartial generalization as to the likeness of the whole body in education we shall do well to refrain from hasty generalizations that the whole body of educational need is like that with which we have informed ourselves and like that alone about the publisher forgotten books publishes hundreds of thousands of rare and classic books find more at forgottenbooks.com this book is a reproduction of an important historical work forgotten books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy in rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition we do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works
