for too long marketers of sustainable goods and services have targeted deep green consumers to promote their products and they have little to show for their efforts in this innovative book jacquelyn ottman shows how the green market has moved beyond such niche marketing and how marketers will find greater success promoting the inherent superior value of their offerings greener products are now available within every industry and are a part of our everyday lives but they didn t get to be so ubiquitous just because they are better for the planet whether they were promoted as such or not sales of green products have grown so fast because of the added value they provide health superior performance good taste cost effectiveness or simply

convenience this central emphasis on primary benefits the new rules is critical to winning over the mainstream consumer and to driving overall organizational growth the new rules of green marketing helps readers understand why value based sustainability marketing has become a critical organizational capacity and how readers can adopt this approach in their own organizations illustrated by examples from both international mainstream and the more niche deep green leaders who are showing everyone else the way the book provides practical strategies tools and inspiration for building every aspect of a credible value based green marketing strategy including how to use a proactive approach to sustainability to spur innovation how to frame environment related benefits with relevance to mainstream brands how to communicate with credibility and impact and avoid greenwashing how to team up with stakeholders to maximize outreach to consumers how to use a life cycle orientation to ensure the integrity of one's offerings how to best take advantage of recent technological advances in social media drawing on the latest data from leading researchers and reflecting on learnings from ottman's corporate clients and other pioneers including ge nike hsbc method starbucks timberland hp natureworks philips procter gamble stonyfield farm and wal mart this book shows how market leaders are edging out the competition using effective value first marketing strategies this book captures the best of the author's previous groundbreaking books on green marketing and takes the content into the 21st century whereas earlier works focused on readers who were less familiar with green initiatives this work squarely focuses on a new generation of marketers who likely themselves grew up with an appreciation of sustainability and who want and need to know how to connect effectively with mainstream consumers

the greening of cities but too often he notes urban greening efforts focus on everything except nature emphasizing such elements as public transit renewable energy production and energy efficient building systems while these are important aspects of reimagining urban living they are not enough says beatley we must remember that human beings have an innate need to connect with the natural world the biophilia hypothesis and any vision of a sustainable urban future must place its focus squarely on nature on the presence conservation and celebration of the actual green features and natural life forms a biophilic city is more than simply a biodiverse city says beatley it is a place that learns from nature and emulates natural systems incorporates natural forms and images into its buildings and cityscapes and designs and plans in conjunction with nature a biophilic city cherishes the natural features that already exist but also works to restore and repair what has been lost or degraded in biophilic cities beatley not only outlines the essential elements of a biophilic city but provides examples and stories about cities that have successfully integrated biophilic elements from the building to the regional level around the world from urban ecological networks and connected systems of urban greenspace to green rooftops and green walls and sidewalk gardens beatley reviews the emerging practice of biophilic urban design and planning and tells many compelling stories of individuals and groups working hard to transform cities from grey and lifeless to green and biodiverse
