Department of Justice Appropriations Authorization Act, fiscal years

2004 through 2006 2004 there's no doubt that hurricane Katrina was one of the most devastating weather events to hit the United States, costing lives, property, and prosperity in catastrophic numbers. Author Alvin Jacques provides a firsthand look at the facts, drama, details, and aftermath of this powerful storm. A survivor of Hurricane Katrina, Jacques considers himself lucky to be alive and credits his strong faith in God for both his survival and the opportunity to tell his story. In this memoir, he examines the enormous devastation and casualties and tells a heroic tale of survival. Catastrophic Gumbo includes more than thirty stories that describe what really happened during this natural disaster, including his rescue by the Coast Guard, his experience of six days of chaos at the Superdome, the drowning of his mother, the ever-present death and destruction that he witnessed, and the corruption of the New Orleans Police Department. A compelling account, Catastrophic Gumbo gives a behind-the-scenes and personal look at the before, during, and after of this tragedy that hit Louisiana, Mississippi, and Alabama in 2005.

Mitigating Global Climate Change Through the Adoption of Demand-side Technologies 2016 in today s times more and more companies pursue global sourcing strategies in some form and to some extent the most prominent reason for the increased interest in global sourcing is the idea to benefit from factor cost differences between sourcing regions however recent research indicates that cross border sourcing is no panacea to generate cost savings there are situations in which international sourcing does not lead to the intended price reductions or even causes expensive back-sourcing activities accordingly the

ambiguous image of global sourcing is the point of departure for the dissertation at hand thus the main purpose of this thesis is to explore how global sourcing can contribute to a firm's purchasing performance the results indicate that the accumulation of social capital between the buying organisation and its international suppliers can increase the sourcing success however given the limited amount of resources for those intimate buyer supplier relationships close partnerships cannot be maintained with all suppliers consequently the research at hand points in the direction that global sourcing can be a means to increase the intensity of competition in supply markets facilitating the pursuit of more adversarial relationships
