this is essential reading for students on primary initial teacher education courses including university based pgce pgde ba qts bed school based scitt school direct teach first and employment based routes into teaching this book covers practical and philosophical aspects of engineering paying special attention to the social impacts of emerging technologies some fundamentals of philosophy of technology are introduced followed by social economic and environmental discussion and implications in different disciplines each chapter provides insights on the responsibilities involved in the design of engineering projects the examples presented combine concepts about the impacts of engineering in society at the same time that incorporates new technological models yielding an innovative approach about the topics the internet of things iot is a network of devices and smart things that provides a pervasive environment in which people can interact with both the cyber and physical worlds as the number and variety of connected objects continue to grow and the devices themselves become smarter users expectations in terms of adaptive and self governing digital environments are also on the rise although this connectivity and the resultant smarter living is highly attractive to general public and profitable for the industry there are also inherent concerns the most challenging of these refer to the privacy and security of data user trust of the digital systems and relevant authentication mechanisms these aspects call for novel network architectures and middleware platforms based on new communication technologies as well as the adoption of novel context aware management approaches and more efficient tools and devices in this context this book explores central issues of privacy security and trust with regard to the iot environments as well as technical solutions to help address them the main topics covered include basic concepts principles and related technologies security privacy of data and trust issues mechanisms for security privacy trust and authentication success indicators performance metrics and future directions this reference text is aimed at supporting a number of potential audiences including network specialists hardware engineers and security experts students researchers academics and practitioners shows how digital media connects people to their lived environments every day millions of people turn to small handheld screens to search for their destinations and to seek recommendations for places to visit they may share texts or images of themselves and these places en route or after their journey is complete we don t consciously reflect on these activities and probably don t associate these practices with constructing a sense of place critics have argued that digital media alienates users from space and place but this book argues that the exact opposite is true that we habitually use digital technologies to re embed ourselves within urban environments the digital city advocates for the need to rethink our everyday interactions with digital infrastructures navigation technologies and social media as we move through the world drawing on five case studies from global and mid sized cities to illustrate the concept of re placeing germaine r halegoua shows how different populations employ urban broadband networks social and locative media platforms digital navigation smart cities and creative placemaking initiatives to turn urban spaces into places with deep meanings and emotional attachments through timely narratives of everyday urban life halegoua argues that people use digital media to create a unique sense of place within rapidly changing urban environments and that a sense of place is integral to understanding contemporary relationships with digital media 1 import multiple digital originals create silhouettes and use layers to build composite images such as a full color magazine ad
